**STATE PRESIDENT
AND
HON. STATE SECRETARY'S
MESSAGE**

Dear Members

Season's Greetings!

Like other sciences, modern medicine is an evidence based ever developing science having worldwide acceptance. It is changing lives of people by effectively eradicating, controlling and fighting various old and emerging life endangering diseases in the world.

Modern medical science in our country is also doing its best under able guidance of our Hon'ble PM Modi Ji. Still there are many challenges putting hurdles in development of modern medicine and if not removed in time these may impede development and advances of Healthcare system in our country.

India is a very old civilization which has its own indigenous medical system. No modern medical scientists can deny role of Ayurveda and other medical streams. But all streams have their own principles and pharmacopeias quite different to modern medicine. Mixing these streams will give death blow to our traditional medical system and also damage progress, quality and effectiveness of modern medicine. The country must allow all systems to do scientific research and develop separately.

The covid 19 pandemic has shown the strength of modern medical science and strong commitments and sacrifices of modern medical professionals.

In our country, more than 1500 doctors of modern medicine have sacrificed their lives fighting covid 19. These covid martyrs belonged both

from govt. and private sectors who never stopped their professional works during this devastating pandemic.

We appreciate Govt. of India's scheme of compensations for covid warriors under PM Garib Kalyan Yojna but we are very sad to see covid martyrs from private sector not being compensated under this scheme. We request government to remove this discrimination. All govt. and private doctors who sacrificed their lives working in this period, did so on the appeal of our Hon'ble PM, under requirements of the Epidemic Disease Act and under pious professional commitments.

Modern medical professionals in the country are facing attacks not only on their science from vested interests but are facing in security professionally and physically. This must be stopped immediately by a deterrent central act with a strong will and mechanism to enforce them. Medical profession has been subjected to many unwarranted and impractical acts & rules made by governments. As law makers you must support IMA's proposals to central govt. for promulgation of a central protection act against violence on medical professionals and institutions. (Provisions of act should be included in IPC and CrPc) and amendments in other vexing regulating acts against this profession.

The science of modern medicine needs to be regulated by democratic will of the medical professionals of the country and the NMC act must be amended to express this will. There cannot be any ground to deny democratic rights of the modern medical professionals to regulate their science and practice. We hope our law makers will seriously ponder over it.

Even with limited medical infrastructures and numbers of medical professionals in the country, both public and private sectors have done its best for ailing people of India. The health budget of the country must be brought immediately to 5 % of GDP and continue increasing in future. We need to strengthen govt. health sector. Health should be brought in

concurrent list. There should be Pan India parity in compensations and service conditions of medical professionals. An Indian medical service is need of hour. All available and willing medical human resources may be given opportunity to be appointed in govt. sector increasing medical posts, relaxing age and other rules. Medical education should be made affordable. CMEs and Research should be financed by govt. at all levels. For encouraging medical professionals to work in rural areas a national policy of incentives and amenities be declared. Role of private health sector is also very important. They should also be encouraged and incentivized to meet need of common people and made free from Inspector Raj. The pricing of drugs should be made uniform and affordable without compromising with quality.

IMA, the largest and oldest representative association of modern medical professionals should be heard and must be given representations in all institutions and committees relating policy and execution of health in the country.

We hope a big breakthrough in health care in the country will come by our efforts soon.

On behalf of IMA GSB, we congratulate Junior Doctors Association of various Govt. Medical Colleges of Gujarat for their 10 days of successful struggle, their unity and strength paid off and they have got Govt. Resolution from stating 1 years of SRship equal to bond. IMA GSB & IMA HQs New Delhi has extended their support to JDA & requested Govt. of Gujarat to consider their demands & take necessary action. We are thankful to Govt. of Gujarat for this amicable solution.

Jay IMA

Long live IMA

Dr. Devendra R. Patel
(President, G.S.B., I.M.A.)

Dr. Kamlesh B. Saini
(Hon. State Secy., G.S.B., I.M.A.)

NO. 38/2021

Date : 12/08/2021

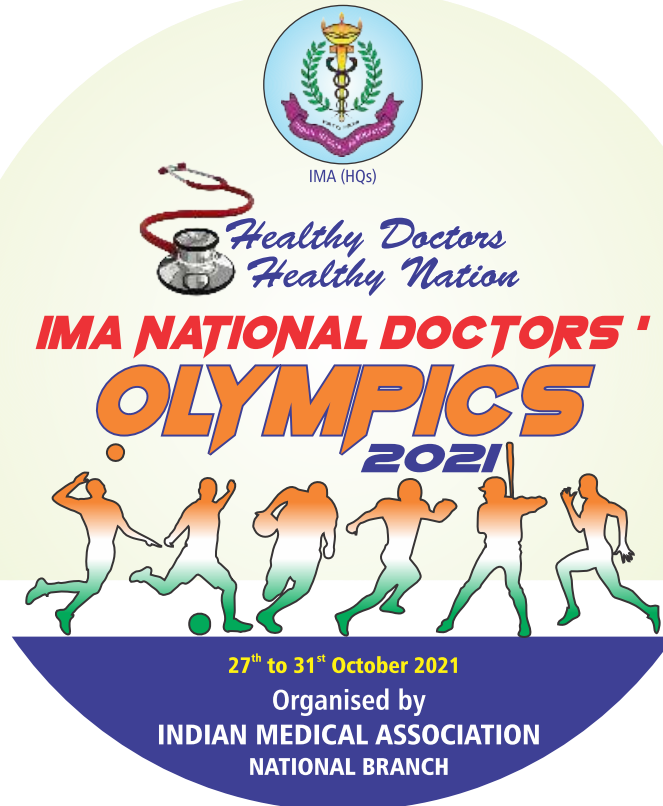

To
President
IMA (Gujarat Branch)
Subject: Letter of thanks and appreciation for your support to strike by JDA BJMC

Respected Sir,
After 10 days of successful struggle, our unity and strength paid off and we have got Government Resolution from stating 1 year of SRship equal bond for 2018 batch, this has occurred first time in history of Gujarat.
Government has also assured of forming a committee to decide on favourable provisions for 2019 and 2020 batch.
No stipend or leave will be deducted for absence during strike for any participating residents.
This all has occurred because of continuous sheer will power, efforts, unity, strength of JDA BJMC.
This victory is solely of JDA BJMC that stood united till last moment till GR came.
JDA BJMC is officially calling off strike from now onwards.
We are Grateful and indebted to IMA (Gujarat Branch) for their support at crucial time and boosting our moral.
Thanking You

President
Dr. Vishwajeet Raj
(Raj)

“IMA NATIONAL DOCTORS' OLYMPIC 2021”

27th to 31st October 2021

Dear Doctors,

National headquarters of Indian Medical Association is proudly announcing National IMA Sports Olympics under the aegis of IMA National Sports committee, which is scheduled in the last week of October 2021 at city of Nashik in Maharashtra.

Under the able leadership of our mentor **Dr Ketan Desai** and our guiding force **Dr Ravi Wankhedkar**, our National President **Dr Jayalal** and our Honorary Secretary General **Dr Jayesh Lele** have entrusted us to carry out this mega event for our esteemed members of IMA.

This Mega event includes all track and field sports along with Racket sports and Team games like football and 20-20 cricket tournaments as well.

Our Co - Chairman Dr Aniruddha Bhandarkar has made necessary arrangements there in Nashik to get all these activities done along with swimming championship also.

All these sports activities will attract state nominations while having Intra-State / Inter- district competitions and getting champions nominated along with wild card entries at nominal individual fee, entries will also be entertained...I welcome Sports lovers to come to **Nashik** as the dates are Climate and Weather friendly on **27, 28, 29, 30 and 31st October 2021**.

Requesting you to block these dates in your calendar as the brochure is here for your kind perusal before you book tickets and hotels at Nashik. Online registration will also be available and will shortly be shared with proper links and bank details.

Looking forward to seeing you as I share crucial cell numbers to you so that you can post your queries and doubts....

With due regards from IMA National Sports Committee

Dr Anil Bhadoria

IMA extends support to striking junior docs

Dr Jayesh M Lele of Indian Medical Association said they 'fully support JDA's genuine demands'

Dr Mona Desai, ex-AMA prez, addressing the striking resident doctors

Ahmedabad Mirror Bureau
feedback@ahmedabadmirror.com

TWEETS @ahmedabadmirror

The Indian Medical Association on Tuesday extended support to the agitation of the Junior Doctors Association in Gujarat. The JDA has been on strike with the agitation completing seven days.

The letter from Delhi came after the Gujarat branch of IMA as well as Ahmedabad Medical Association wrote in support of the junior doctors. Earlier this week, even the Gujarat Medical Teachers Association (GMTA) extended their support to the agitation.

In a letter to the state government on Tuesday, Dr Jayesh M Lele, honorary general secretary of the national IMA stated that the organisation stood "in full support of the JDA's genuine demands".

While the state government has taken a stand against the protesting doctors, the JDA too has not backed down from the confrontation over the issue of rural service and the

counting of Covid duty as per 1:2 basis.

In a letter to the state government on Tuesday, Dr Jayesh M Lele, honorary general secretary of the national IMA stated that the organisation stood "in full support of the JDA's genuine demands".

Lele stated that the junior doctors being asked to vacate their hostels was unacceptable.

This is in light of several of the six medical colleges in Gujarat cutting off utilities in hostels and asking junior doctors to move out in retaliation to their agitation.

The letter further asked the state government to consider their demands and take necessary action.

Panel to address doctors, if they end stir'

TIMES NEWS NETWORK

Ahmedabad: On the sixth day of the resident doctors' strike across Gujarat, the state government showed intent to resolve the issue by forming a five-member committee on Tuesday. However, the announcement came with a rider - the doctors must end the stir first.

On Tuesday senior members of Indian Medical Association Gujarat chapter met the doctors on strike and supported the stir. The doctors are demanding 12 bond period, extended stint at their alma mater and benefits of Seventh Pay Commission among others.

After a video conference with the deans of colleges and

Members of IMA Gujarat chapter met doctors on strike on Tuesday

senior health department officials on Tuesday evening, DyCM Nitin Patel said the state government would try to provide

desired postings. "A dean-level five-member committee would be formed and the demands, which can be addressed,

will be fulfilled. The PG examinations in all colleges except Ahmedabad were conducted on time, and thus there was no issue. The issue is only of 250 doctors," said Patel.

Patel added that talks would take place only after doctors call off the strike. "They report at places where they are assigned. As they are getting education at nominal rates, it's their moral duty to give service where it's needed the most," he said.

Doctors however continued their stir, rejecting the "arm-twisting tactics". "Why does government try to divide students? They have not addressed core issues, and our stir will continue," said a Junior Doctors' Association member.

ડોક્ટરોની હડતાળને આઈએમએ-હેડ ક્વાર્ટરે ટેકો આપ્યો

જુનિયર ડોક્ટરોની હડતાળને હવે ઈન્ડિયન મેડિકલ એસોસિએશનના હેડ ક્વાર્ટર દિલ્હી દ્વારા પણ સમર્થન જાહેર કરાયું છે અને પ્રશ્નોનો તાત્કાલિક સંતોષકારક ઉકેલ લાવવા. જરૂરી કાર્યવાહી કરવા ગુજરાત સરકારને વિનંતી કરી છે. તેમ આઈએમએ-ગુજરાતના માનદ મંત્રી ડો. કમલેશ સૈનીએ જણાવ્યું હતું.

નવસારીમાં મેડિકલ એસોસિએશને સિનિયર તબીબોનું સન્માન કર્યું

નવસારી | નવસારી મેડિકલ એસોસિએશન દ્વારા ડોક્ટર્સ ડે અંતર્ગત નવસારી મેડિકલ હોલમાં કાર્યક્રમ યોજાયો હતો. કાર્યક્રમમાં કોરોના દરમિયાન મૃત્યુ પામનારા તબીબોને શ્રદ્ધાંજલી અપાઈ હતી. આ ઉપરાંત અનેક સિનિયર તબીબોનું સન્માન પણ કરાયું હતું. એસોસિએશનના પ્રમુખ ડો. આર.બી. અગ્રવાલ સહિતના એસો. ના હોદ્દેદારો, સભ્યો અહીં હાજર રહ્યાં હતા.

કોરોનામાં મૃત્યુ પામેલા ડોક્ટરોની યાદમાં સ્મૃતિવૃક્ષ રોપાયા, ભેસાણમાં 500 વૃક્ષ વાવી તેમના નામની તપ્તી પણ મુકાઈ

કોરોના કાળમાં દર્દીની સેવા કરતા કરતા મૃત્યુ પામેલા ડોક્ટરોના સન્માન અને યાદમાં IMA સુરત, FPA સુરત અને કોરોના અભ્ય એન-જીઓએ સાથે મળી ભેસાણ લેક ગાંડનાં 500થી વધુ વૃક્ષોનું જાપાનીઝ મિયાવાકી પદ્ધતિથી વૃક્ષારોપણ કર્યું હતું. મહત્વની વાત એ છે કે ડોક્ટરોના નામની તક્તી પણ જે ત છોડે સાથે મુકાઈ છે.

કોલગર્સ સાથે રંગારે છૂટતાં ભારે દોડાદોડી મચી હતી.

નવી સિવિલ હોસ્પિટલના જુનિયર તબીબોની હડતાળને IMAનો ટેકો

સુરત | એસોસિએશનના પ્રમુખ ડો. જિગ્નેશ બોન્ડ સહિતની વિવિધ માંગણીઓને મુદ્દે રેસિડેન્સ તબીબો હડતાળ મંગળવારે સાતમાં દિવસે પણ રહેવા પામી છે. ઈ-ડીયન મેડિકલ એસોસિએશન જુનિયર તબીબોની હડતાળને ટેકો જાહેર કર્યો છે.

મંગળવારે હડતાળના સાતમાં દિવસે ઈ-ડીયન મેડિકલ એસોસિએશને હડતાળને ટેકો જાહેર કર્યો હતો. તેથી સુરત આઈએમએના પ્રમુખ ડો. હિરલ શાહ જુનિયર તબીબોને ટેકો આપવા સિવિલ કેમ્પસમાં દોડી આવ્યા હતાં. તેમણે હડતાળીયા તબીબોને ટેકો જાહેર કરીને તેમની માંગણી સ્વીકારવાની સરકારને સલાહ આપી હતી. જુનિયર ડોક્ટર

કોરોના દરમિયાન પોઝિટિવ દરદીઓની સારવાર કરતાં જીવ ગુમાવનાર

To,
President, IMA,
Gujarat chapter

Sub: Fever Rash (FR) Surveillance for Measles & Rubella (MR) in Gujarat

At the outset I would like to appreciate each one of you for the consistent support that is being offered by you all in the ongoing COVID-19 efforts. Your contribution was instrumental in bringing down the COVID related mortality and was also crucial to take the burden off from the public health facilities. The vibrant private health sector has always been a blessing for Gujarat.

You all are aware that robust surveillance system is essential early detection of diseases and subsequent containment. Measles & Rubella diseases are targeted for elimination by 2023 and key to elimination is to have a highly sensitive surveillance system. To have certification standard MR surveillance, India expert advisory group (IEAG) for MR elimination has set the target to achieve Non-Measles Non-Rubella (NMNR) rate of 2 cases/100,000 population.

In 2021, MR surveillance indicators have slipped in Gujarat and are a cause of concern as below -

- There is 72% decline of suspect MR cases in 2021 as compared to 2020 (as on week 23)
- The NMNR rate has shown decline from 0.71 in 2020 to 0.51 in 2021
- There are 6 districts/corporations which show nil notification of suspect MR cases in 2021 - Sabarkantha, Mahisagar, Arvali, Mehsana, Dang and Gandhinagar Corporation.

Govt. of Gujarat with technical support from WHO-NPSP SMOs is rolling out FR surveillance for Measles and Rubella from 1st July 2021. You are requested to appeal to the Presidents of all the district/corporation IMA chapters in Gujarat through your official letterhead to -

- To report (to RCHO/SWHO SMO) every case of Fever and maculopapular rash irrespective of cough/coryza/conjunctivitis & irrespective of diagnosis in all age groups including adults.
- To issue similar appeal to all the members of their respective district/corporation chapters
- To continue to support in case investigations, sample collections of AFP, MR, DPT cases
- To continue to advocate and support in strengthening Routine Immunization services.
- To discuss Measles Rubella surveillance in CME meetings

We appreciate your efforts and support in this. Your active participation and support had given us tremendous support during last COVID-19 peak. And I am sure your contribution will make similar impact on Measles Rubella surveillance in the state.

Additional Director (FW)

e-mail : addirfw.health.gujarat@gmail.com

To,
President, Academy of Paediatrics, Gujarat
President, Indian Medical Association, Gujarat

Subject: Strengthening the reporting of AEFI cases from Private Sector.

You are aware that vaccine is safe and cost effective measure to protect against the vaccine preventable disease. Sometime there are Adverse Events following Immunization (AEFI) which are minor and self-limiting and rarely lead to hospitalization. However, all the AEFIs needs to be reported to take corrective actions and to form the appropriate strategies to address them.

There are laid down criteria and procedures to report, investigate and for causality assessment of AEFI cases. All AEFI (minor, severe and serious) cases are recorded and reported through below mentioned two mechanism.

1. AEFI after COVID-19 vaccination is being reported and recorded in Co-WIN SAFE- Vac
2. AEFI cases after routine immunization is being reported in SAFE-Vac.

Reporting of the AEFI from Private Sector is very much important. Academy of Paediatrics being one of the most important stakeholder needs to report the AEFI cases through District Immunization Officer. It may kindly be noted that District/Corporation Immunization officer (RCHO) is the nodal officer for AEFI reporting and have access to Co-WIN SAFE-Vac and SAFE-Vac software. The district and corporation wise list of the nodal officer is attached herewith for your ready reference.

We are kindly request you for wider circulation of the list with the president and nodal officers of AOP to strengthen the reporting of AEFI from private sector. Look forward to your support in this matter.

Ref. No. : GSCPT/verification/173012021

Date : 11/08/2021

To,
The President,
Gujarat State Branch, IMA,
AMA House, 2nd floor, Near Natraj Cinema,
Ashram Road,
Ahmedabad, Gujarat - 380009

Subject: Regarding verification of Physiotherapist's Council registration.

Respected Sir/Madam,

Gujarat State Council for Physiotherapy (GSCPT) is constituted by Gujarat government & Published in The Gujarat Government Gazette, Act No. 18 of 2011 for the purpose of co ordination & determination of standards of education in the field of Physiotherapy, to regulate the practice of Physiotherapy and for maintenance of register of Physiotherapists in the state of Gujarat.

- First Council committee notification was released in year 2016 & council has started its functioning from 1st October 2016. Till date, around 12000 physiotherapists from all over Gujarat State are registered with GSCPT.
- As per GSCPT Act 2011 section 33 (1) it is mandatory to register with GSCPT to practice as a Physiotherapist in the State of Gujarat.
- As per section 42 of the GSCPT act, practicing as a physiotherapist without registration is a legal punishable offence.

You are requested to kindly inform all Gujarat State registered medical practitioners to verify GSCPT registration number while doing any communication with the Physiotherapists of Gujarat State.

Thanking You,

Your's Faithfully,

Registrar I/C,
Gujarat State Council for Physiotherapy,
Gujarat State.

|---|---|---|---|---|---|---|---|---|
| | | | 5 | | | | | |
| | 6 | | 1 | | 3 | 9 | 2 | |
| 3 | | 8 | 2 | | | 5 | | 6 |
| | 9 | 6 | | | | | | 8 |
| | | | | 7 | | | | |
| 7 | | | | | | 2 | 5 | |
| 5 | | 1 | | | 8 | 4 | | 2 |
| | 8 | 4 | 7 | | 2 | | 1 | |
| | | | | | 4 | | | |

The objective of sudoku is to enter a digit from 1 through 9 in each cell, in such a way that:
 Each horizontal row contains each digit exactly once
 Each vertical column contains each digit exactly once
 Each 3 by 3 square contains each digit exactly once

KEN KEN PUZZLE

- 1 Write down 1 to 5 in each row and each column in such a way they come only once, in each row and column.
- 2 The heavily-outlined groups of squares in each grid are called "cages." In the upper-left corner of each cage, there is a "target number" and maths operation (+, -, x, ÷).
- 3 Fill in each square of a cage with a number. The numbers in a cage must combine—in any order, using only that cage's maths operation—to form that cage's target number.
- 4 The number written in the cage of one square, will be the answer for the cage.
- 5 Important: You may not repeat a number in any row or column. You can repeat a number within a cage, as long as those repeated numbers are not in the same row or column.

FOR EXAMPLE

Answer Page No. 80

CONSUMER CASE NO. 874 OF 2015

1. RANJIT SARKAR9B,Complainant(s)
NORTHERN AVENUE
KOLKATA-700037

Versus

1. ILS HOSPITALS & 6 ORS.
1, KHUDIRAM BOSE SARANI, BESIDE NAGERBAZAR FLYOVER,
KAZIPARA, DUM DUM, KOLKATA-700080

BEFORE:

HON'BLE MR. JUSTICE R.K. AGRAWAL, PRESIDENT

For the Complainant: Mr. Rabin Majumder, Advocate
Ms. Akanksha Srivastava, Advocate
with Complainant in person

For the Opp. Party: Mr. Partha Sil, Advocate
Mr. Tavish B. Prasad, Advocate
Ms. Binota Roy, Advocate

Dated : 09 Mar 2021

ORDER

R.K. AGRAWAL, J., PRESIDENT

1. Hon'ble Mr. Dinesh Singh, Member, took a contrary view and ordered that the matter be referred to the opinion of a Medical Board of Experts.
2. Since the Members of the Division Bench came to different conclusions, the matter has been referred to a third member under section 20 (1A) (iii) of the Consumer Protection Act, 1986 for giving opinion on the following point of difference:-

“Whether the Complaint be dismissed OR whether the matter be referred for the opinion of a Medical Board of Experts.”

I find that learned Member Dr. S.M. Kantikar has dealt with each of the aforementioned evidence/documents/material which was brought on record as follows:-

Allegations: ER Medical officer on 10.07.14 failed to identify the life-threatening emergency of abdominal tenderness. X-Ray chest had elevated dome of diaphragm – suggestive of intra-abdominal injury and haemorrhage.

We note that the Complainant intelligently brought out certain facts of this case for his own convenience, though it was not a case of Blunt Abdominal Trauma (BAT). The Complainant categorically stated that his son had actually walked down to the Emergency department without use of a wheelchair or stretcher which proves the patient had no severe abdominal and back pain. However, the x-rays revealed mild anterior wedging of D11- D12 vertebrae and therefore the EMO promptly referred the patient to the Orthopaedic Surgeon ...Therefore, the allegation of deficiency in rendering medical service to the patient in the emergency is not sustainable, as made on surmise and conjecture. In our view, the doctors have done, which they were expected to do at the given situation.

Allegation : Haematocrit value was not evaluated to evaluate the blood loss.

The fall in Haematocrit (Hct) and Haemoglobin from 15.2 g% to 13.8g% and 12.6g% within 36 hours after admission was expected because of hemodilution occurs after administration of two liters of IV fluid to treat the sudden hypotension. In the instant case the CT scan findings suggested Adrenal haemorrhage which was just limited to Adrenal parenchyma and it was not massive. Therefore, fall in Hb% in any manner doesn't relate to scanty Adrenal haemorrhage. However, subsequent haemoglobin levels were stable on 12.07.2014, despite the patient receiving large quantities of Intravenous fluids.

Allegation : Orthopaedic surgeon saw the patient after 12 hours on 11.07.14. Surgeon's opinion after taken further 2 hours and advised USG and not CT Abdomen

The learned counsel for the Opposite Parties filed 35 plates / films of USG, CT-MRI and CTPA on record as mentioned as below:....

We have perused all the films and reports. It is pertinent to note that the patient was admitted in the evening on 10.07.2014, the USG, CT, MRI done on 11.07.2014, none of the films shows any signs of haemorrhage or abdominal fluid collection. However, subsequently the CT abdomen and CTPA done on 12.07.2004 revealed moderate ascites (around 500 ml), with low HU values, it was conclusively not blood. In our view it was not a Haemorrhagic / Hypovolemic shock in the instant case.

As per the Complainant's submission, the CT and MRI of Dorsal Lumbar spine covers only lower back. However, the Radiologist who conducted CT and MRI scans of the dorso lumbar spine stated in her report and affidavit, that she viewed the extra spinal structures around the Lumbar Spine like Intra-Abdominal and Retroperitoneal structures. The Radiologist as a usual practice across the globe examine and note the incidence of extra spinal findings. Radiologist filed a reference article '**Incidental Extra Spinal Findings at CT Lumbar Spine on Wide Field of View Reconstruction**' by Tom Sutherland et al J. Spine, Neurosurgeon 2013 2:4, which categorically observed that "The detection of incidental findings beyond the region of interest is well known and has been explored for a number of imaging examinations."

Thus, in our considered view, if there had been any intra-abdominal soft tissue injury leading to collection; it would have been easily detected by the Radiologist. We also note that it was confirmed after discussion between Opposite Party No. 4 and the Radiologist that there was no organ injury or abdominal collection.

74. It is pertinent to note that the Cardiologist performed bedside ECHO in the night on 11.07.2014 showed "right ventricular free wall hypokinesia, right ventricular systolic dysfunction and dilated pulmonary artery along with IVC (Inferior Vena Cava) of 16 mm with sluggish respiratory variation combined with hemodynamic instability, the findings raised a very high degree of suspicion of PE and thus patient was treated accordingly and CTPA was planned after stabilization. Thus, in our view, at that stage advice for ECHO was essential not to rule out PE alone but also to know about Left Ventricle function, to rule out Acute Myocardial Infarction, IVC measurement for guidance of fluid therapy which is the gold standard. In our view the Cardiologist considering the patient's clinical signs such as obesity, ongoing immobilisation and hypoxia had correctly advised intensive spirometry post haemodynamic stabilisation and ruled out pneumothorax by Chest X-Ray. Thus, the patient was treated with the accepted medical protocol. We would

like to quote a reference from the standard medical books '**Harrison's Principles of Internal Medicine, 19th Ed., Vol. 2**' as well as '**Oh's Intensive Care Manual, 7thEd.**' wherein states that:

"Echocardiography has its best application in haemodynamically unstable patients, where it can be rapidly brought to the patient. If the patient has RV dilation and hypokinesia in the right clinical setting, PE is extremely likely...if there is RV dilation but no visible embolus, then a CTPA scan is required depending on how unstable the patient is..."

Allegation : Bleeding Adrenal glands, but double anti coagulation was administered.

The Complainant alleged that the doctors were in lack of medical knowledge and expertise while advising injection Clexane to the patient when there was intra- abdominal continuously active bleeding from the ruptured left Adrenal gland. It is apparent from the medical record that that on 11.07.2014 Dr. Prasenjit Sarkar advised Injection Clexane and the patient received only one dose of Inj. Clexane at 10:00 p.m. on 11/07/2014. Though Inj. Arixtra was prescribed by Dr. PrasunHalder but was never administered to the patient. The further injection Clexane (LMWH-Enoxaprin) was to be given only after confirmation of no abdominal collection by the Opposite Party No. 2 and 4. As the treating doctors had strong suspicion with provisional diagnosis of Pulmonary Embolism needs anticoagulant therapy. Therefore, the use of LMWH is a standard medical protocol.

Obesity is an important independent risk factor for thrombosis and VTE is common in obese patients. Obesity is regarded as prothrombotic state. LMWH has theoretic advantages in obese patients as a result of superior subcutaneous bioavailability... However even LMWH at standard fixed doses may not be sufficient to prevent VTE in morbidly obese patient.

Thus, the decision to administer Clexane in the instant case was justified and it was not wrong decision or negligence.

ALLEGATION : 7. Golden hour was lost and no proper information was given to attendees, hence could not shift to higher centers.

8. USG Abdomen was done 3 hour later after being advised by 9 am on 11.07.14.

9. CT Pulmonary Angiogram was done 12 hours later after being advised

- From the medical record and the affidavit of, Dr..... it is evident that he had discussion with patient's relatives in detail regarding the risk involved in conducting CTPA and he even spoke to two independent doctors of the complainant's choice (Dr. ParthaSen and Dr. Paromita Trivedi) after which only the consensus was to go ahead with CTPA. He further spoke personally to the Radiologist and hospital authority to conduct CTPA and CT abdomen. During CTPA, Dr..... and Dr..... were present inside the CT room wearing lead aprons and continued patient ventilation with Bain's circuit.
- We further note that the CTPA was advised in the night on 11.07.2014 and the series of blood and radiological investigations were done. The patient's family members expressed their intent to get the patient discharged against medical advice (DAMA) and to shift the patient to Fortis Hospital in the early hours on 12.07.2014. Therefore, the ILS Hospital initiated process of discharge in the night but representative of Fortis Hospital did not accept for shifting such critical patient. Therefore the patient was re-admitted in ILS Hospital, during the process, valuable time was wasted. Thus, due to initial reluctance of patient side and after much persuasion the pending CTPA was performed in the afternoon on 12.07.2014. The complainant concealed these facts in his pleading.
- Allegations: Even after drop in BP proper monitoring was not done and did not evaluate doing CT Abdomen to rule out abdominal bleeding.
- 6. All signs of internal haemorrhage such as fall in BP raised pulse and abdominal tenderness was not considered due to callous attitude.
- On 11.07.2014 at around 2:00 p.m. the patient's MRI of the Dorso Lumbar Spine was done that revealed "Acute compression collapse of D12 vertebra without significant encroachment into spinal canal; Mild disc degenerative disease at L5- S1 level, mildly compromising both neural foramina, without significant compression over exiting nerve roots." In addition, Dr. SarmisthaGuha noted that "No abnormal pre or paravertebral soft tissue seen. Minimal peri-hepatic and peri-splenic fluid signal seen."
- Thereafter at 3.00 p.m. CT scan of the Dorso Lumbar Spine was done by Dr. SarmisthaGuha, wherein it revealed "Compression collapse of upper end plate of D12 vertebra without encroachment into spinal canal." The presence of minimal dependent pleural effusion was also noted and

minimal free fluid was seen in the infra hepatic space. The Radiologist, Dr. SarmisthaGuha also reported focal tiny calcification in segment VI of liver. Had there been any abdominal or retroperitoneal injuries or haemorrhage, it would have been noted by the Radiologist especially when she made the effort to note even a tiny calcification in the liver.

The moderate intra-abdominal fluid noted on 12.07.2014, whether it was haemorrhage or ascites?

- We have perused the films of CT abdomen done on 12.07.2014 showed moderate ascites and not blood. There was only isolated localized haemorrhage in the left adrenal gland, which is considered to be of little significance by medical literature. Even this minimal left adrenal haemorrhage, which was absent on the 11.07.2014 but is seen on the CT abdomen films done on 12.07.2014, can be rationally explained in the context of the vascular anatomy of the left adrenal, shock state following pulmonary embolism, treatment with drugs like adrenaline to support the patient's falling blood pressure and presence of renal vein thrombosis.

Although the precise mechanism leading to adrenal haemorrhage are unclear in nontraumatic cases, available evidence has implicated adrenocorticotrophic hormone (ACTH), adrenal vein spasm and thrombosis, and the normally limited venous drainage of the adrenal in the pathogenesis of this condition. The adrenal gland has a rich arterial supply, in contrast to its limited venous drainage, which is critically dependent on a single vein. Furthermore, in stressful situations, ACTH secretion increased, which stimulates adrenal arterial blood flow that may exceed the limited venous drainage capacity of the organ and lead to haemorrhage. In addition, adrenal vein spasm induced by high catecholamine levels secreted in stressful situations and by adrenal vein thrombosis induced by coagulopathies may lead to venous stasis and haemorrhage.

In the instant case on 11.07.2014 patient's CT Scan of Dorso lumbar Spine revealed just minimal free fluid collection in infra-hepatic space. The finding was not confirmatory of any solid organ injury or haemorrhage in the peritoneal cavity or retroperitoneal space. It was low attenuation of the free fluid <15 HU. The next CT Abdomen done on 12/07/2014 revealed just localised collection with layering of densities (HU - 63) in the left Adrenal gland. It was specifically suggested as haemorrhage, whereas free fluid in rest

of the abdomen has been reported as moderate ascites as its attenuation was low (<15 HU), nowhere it was matching with the high attenuation of blood or of extravasated contrast. Thus it was not active bleeding. Thus on 11.07.2014, the intra- abdominal or retro-peritoneal or left adrenal gland haemorrhage was ruled out.

The contention of the complainant that his son's life could have been saved had he been receiving blood transfusion owing to the excessive blood loss as a result of alleged intra-abdominal haemorrhage is a clear indication of the complainant's lack of knowledge in the field of medicine. The patient was admitted with a Haemoglobin level of 15.2gm% and his Haemoglobin level was 12.6gm% in the morning of 12.07.2014. Haematocrit level was 40 at 1:30 a.m. on 12.07.2014 which dropped to 37 at 5.30a.m. on 12/07/2014. It is pertinent to note that the patient had a drop in Haemoglobin of 17% or Haematocrit of only 3 (7.5%) which in medical parlance, is not significant enough to cause sudden death of a patient. As per **'The Washington Manual of Surgery', 6th Ed.**, if it was haemorrhage, it correlates with Class II haemorrhage. The massive fluid resuscitation is also one of the causes for fall in Hb%. Further, in class II haemorrhage blood transfusion also not advised.

..trauma is another potential cause of renal vein thrombosis. Complications include pulmonary embolism, renal atrophy, and papillary necrosis. Bland thrombus can coexist with tumour thrombus... As with venous thrombosis elsewhere, the thrombosis is observed as a filling defect during venous phase imaging following intravenous contrast... Recognized complications of RVT include pulmonary embolism..."

Allegation : Post mortem examination was not done which could have accented the cause of Thrombus. The Complainant further alleged that his young son of 36 years old died due to gross medical negligence

It is surprising to note the observation made by Directorate of Health Services, Government of West Bengal, Calcutta and the PE-8 Committee of WBMCI on the hospital for not informing the Police initially for an accidental case and not sending the body for an autopsy later and held it as "medico-legally an act of negligence".

Medico-legal Autopsy:

- The medico-legal autopsy, which is performed on the instructions of the legal authority responsible for the investigation of sudden, suspicious,

homicide, suicide, obscure, unnatural, litigious or criminal deaths. This legal authority may be a coroner, a medical examiner, a procurator fiscal, a magistrate, a judge, or the police, the systems varying considerably from country to country.

The permission of relatives is not required.

Clinical Autopsy:

- Done for academic purposes, research etc. No legal issue involved (also called hospital autopsy or pathological autopsy or consent autopsy). Permission of relatives is necessary.

In the instant case, at the time of admission to ILS Hospital on 10.07.2014, the patient himself alongwith his father i.e. the Complainant gave a history of fall in his house. They did not express any suspicious or any criminal events. Therefore, the Hospital did not register the case under MLC category. As discussed above, during the course of treatment, the team of treating doctors made all their efforts, but the patient could not survive. As it was not MLC case, the Post Mortem was not done. The Complainant could have lodged a police complaint to conduct Post Mortem, if he would have suspected any foul play or negligence during treatment. He also had a choice for clinical autopsy which he failed to exercise at that time.

1. In view of the material evidence, documents, prescriptions and Reports of various Investigations considered in detail by the learned Member, Dr. S.M. Kantikar, with which I concur, the findings given by the West Bengal Medical Council in my considered opinion loses its significance.
2. So far as the merits of the matter is concerned, I find that learned Member, Dr. S.M. Kantikar, who is from the Medical Profession, having vast knowledge and experience in that arena, had considered the arguments advanced on behalf of the Parties, various documents/ material, evidence available on record and have elaborately dealt with the same in Para 69 to 104 of his Order. I am not repeating the various material and evidence filed by the Parties as they have been adequately dealt in detail by Dr. S.M. Kantikar in his Order, which has been reproduced hereinabove. I am in full agreement with the findings and reasons recorded by Dr. S.M. Kantikar in his Order as to why there was no medical negligence in the present case and the Complaint is liable to be dismissed.

3. In view of the foregoing discussions, I am of the considered opinion that the matter is not required to be referred for opinion of Experts and the Complaint is to be dismissed.

103. The Complainant appears to be prudent; he himself could have approached the authority or police and demanded for PM. The MCI order/report dated 26.05.2017 was stayed by Hon'ble High Court of Calcutta Order dated 19.12.2017. We are of the considered view that the reports of WBMC, MCI and West Bengal Health Department did discuss the essential ingredients/ Principles of Medical Negligence as laid down by the Hon'ble Supreme Court and other Courts. We are not accepting such reports which are devoid of any findings on negligence. These are not convincing and did not conclusively attribute medical negligence against the treating doctors.

1. **The Consumer Complaint was heard by Division Bench comprising of Dr. S.M. Kantikar, Presiding Member and Mr. Dinesh Singh, Member. Dr. S.M. Kantikar, Presiding Member dismissed the Complaint by observing as under:**

"The treating doctors had treated the patient as per accepted standards of medical practice. There was no deficiency in service; the hospital provided all the necessary infrastructural facilities as well as the support of well-trained medical staff. That despite every sincere effort by the entire medical team at ILS Hospital treating the patient (deceased Indrajit Sarkar) did not succeed in saving his life. It was the rare and uncommon outcome such as left adrenal haemorrhages a result of traumatic injury of the spine. In the instant case the medical limitations which are beyond human control."

Foot note: 874/2015 Judgment in March 2021. Quite surprising the Case has been disposed in six years. A well-judged case by Dr. S.M. Kantikar in spite of the reports by a Medical board and WBMC order. Valuable quotes from Text books and from Indexed articles were the basis of the Excellent Judgment. Lots of case laws were quoted and we have put forth the Medical facts to create the much needed confidence and positive approach for any case even in adverse condition.

In time attending in ER, documenting the clinical finding with exact date and time, being empathetic, communicating with the requested consultants of the patient attendees, taking care during critical evaluation and responding to the request of the patient attendees even if it is impossible has been of great value when the final judgment was pronounced.
