**STATE PRESIDENT
AND
HON. STATE SECRETARY'S
MESSAGE**

Friends

Hope, you must updated your knowledge on Swine flu. Swine Flu is extending its wings and is now in Epidemic stage. This year, up to 12th February only in Gujarat 117 people died due to Swine Flu and 1233 cases have been identified. As we are in medical profession, it is our duty to stop or control this epidemic and help the Government and Society by what ever way we can. Indian Medical Association, Gujarat State Branch along with Health & Family Welfare Department, Govt. of Gujarat organize many district level programme for awareness and information of our members. If any district has not organized such programme, please so. Be vigilant, pick up the cases in early stage and refer it to the designated hospitals. Your co-operation is very much needed. Let us hope with for improvement in condition with gradual decline in cold.

14th & 15th February IMA Gujarat State Branch was fortunate to host the President, World Medical Association, Sir Dr. Michael Marmot, is on the visit of one of the tribal areas of North Gujarat. He saw the changes in the villages, changes in the people which are the results due to IMA's initiative – 'Aao Gaon Chalen'. Our visionary leader Dr. Ketan Desai is himself looking after the project in this area and taking personal interest in the upliftment of the tribal people. This is the single project which has changed the IMA's image in the society. We earnestly request all the local branch Presidents and Hon. Secretaries to adopt at least one village and start doing activities. The restructured uniform project is being given in this bulletin. Dr. Sunil Acharya from Deesa is assigned to monitor this project. Please report to us . Your suggestions are most welcome.

This year's first ever state programme "Medicine & Law" was extremely successful. More than 180 IMA members across the Gujarat attended it at Vadodara. We congratulate Team IMA Vadodara for successfully organizing the programme on behalf of IMA Gujarat. The second such State Programme is on 5th April 2015 at Surat on – Rational use of Antibiotics". The aim of this programme is that our IMA Members will get the knowledge & uplift their skill from the invited National speakers. We request the other big branches to come forward for hosting such programmes like Disaster Management, Communication Skill and Care for Elderly. We at local branch level organises the scientific programmes. We request to keep the scientific programmes on the subject like Pharmaco-vigilance, Post Polio syndrome, Disaster Management, Medicine and Law, Communication Skill, Leadership qualities, Ethics and behavior, Mental health, Diabetes and blindness prevention, Nutrition and public health, Child sexual abuse, Vector borne disease control programme, Maternal mortality etc.

IMA HQ organized State President and State Secretaries meet at New Delhi. Many projects and schemes were discussed. During two days of Marathon Meeting, a clear cut guidelines is given to all states. We are sure you will all give me full support to implement them. We have also planned such meeting of Gujarat Level.

Settings goals is the first step in turning the invisible into the visible. We have set our goal, now it is up to on us to turn invisible in to visible results. We once again request all of you to start taking part in IMA Activities. Give only one hour to IMA in a week and see what we can do. We are confident enough with your love, affection, co-operation and good wishes

To gather we will achieve.

Dr. Chetan N. Patel

(President, G.S.B.,I.M.A.)

Dr. Jitendra N. Patel

(Hon. State Secy. G.S.B.I.M.A.)

Strength & Growth come only through continuous effort and struggle

Member's Information

Dear Members,

As you all know that in today's world, we all need quick & easy communication & data transfer from one place to another. And for that we should have precise destination address. We at GSB IMA have full details of very few members with us. So I request you all to fill up your full details on members information form which we have kept on our website www.imagsb.com. Also pass on this information during each of your programme & continuously insist all members until we have information of all members. Expecting your huge support as this is very crucial for our effective communication with all members.

Thank you.

Dr. Jitendra N. Patel
(Hon. State Secy., G.S.B., I.M.A.)

Off Ashram Road, Navrangpura, Ahmedabad-380009.
Tele. No. : 2658 89 29 E-mail : ppsgsbima1@yahoo.in

Sub.: Organisation of Educative Zonal Seminar by

Local Branch and Financial Assistance by P.P.S. GSB-IMA.

Professional Protection Scheme has arranged successfully Educational Seminars since many years. The last one was held at Ahmedabad Branch.

Looking to the success of these Seminars in educating and awakening our members in prevention and defence of litigations arising as a result of professional negligence or deficiency of service, PPS has decided to have two such Zonal Educative Seminars in each zone of Gujarat State Branch of I.M.A.

The subject of such Educational Programme shall be in relation to

1. Consumer Protection Act
2. Professional Negligence and Deficiency in service
3. Prevention and Defence of such litigation and other related Topics
4. Laws Governing the Medical Practice.

If any branch wishes to have such Zonal Seminar then please, apply to the P.P.S. Office through branch Secretary before 31st March.

Dr. Bipin M. Patel
Managing Director

PROFESSIONAL PROTECTION SCHEME; G.S.B. I.M.A.

Attention Please !!

ALL THE MEMBERS OF P.P.S.

Dear Member,

Professional Protection Scheme has already sent a notice alongwith a Renewal Application form for renewing the membership before 31st March, 2015 for the year 2015-2016 "By Registered Post February 2015 to all the members.

We request you to draw kind attention towards the constitution of P.P.S.G.S.B.I.M.A.

- Clause 10/B :-** A member who does not pay the annual membership fee in advance – before 31st March (before the expiry of the indemnity cover) shall be discontinued without any notice.
- Clause 10/C :-** However if a discontinued member wants to revive his/her membership within one month of the expiry of the indemnity cover he/she shall pay annual membership fee only, but the indemnity cover shall be provided from the day of revival of the membership.”
- Clause 10/D :-** After one month if a member wants to rejoin the scheme, he/she shall be treated as a new member and he/she shall have to pay admission as well as annual membership fees.”

The member who has not sent the Renewal Application form duly filled in alongwith required amount is requested to send it immediately.

Dr. Bipin M. Patel
Managing Director

PROFESSIONAL PROTECTION SCHEME G.S.B. I.M.A.

"P.P.S. House", Beside Sakar-V, Nr. Mithakhali Railway Crossing,
Off. Ashram Road, Navrangpura, Ahmedabad-380009. Tele. 2658 89 29

(Reported by Dr. Bipin M. Patel, Managing Director, P.P.S.)

Sub. : Renewal Notice : 2015-2016

The Office has received back the renewal notices of the following members with postal remarks as 'left' or 'Not Known'. The concerned members are requested to notify immediately change of their addresses to the P.P.S. Office.

SCIENTIFIC UPDATE

INFLUENZA IN 2015

INTRODUCTION:

Influenza is unpredictable disease.

30% NRI visiting India visits Gujarat. So from beginning of Influenza Pandemic in 2009 it was likely that Gujarat will be one of the first affected states in our country. Geographically location of Gujarat is also conducive for round the year influenza activities. Health department had started preparedness to face the situation including surge capacity building. Now it has become seasonal flu and spreading through indigenous local cases so there is no longer threat that it will come through foreigners.

Influenza A (H1N1) pdm09 pandemic was started in March 2009 in Mexico and spreaded over 70 countries in 7 weeks time only. First case was reported in India on 16-5-09 in Hyderabad & on 1-7-2005 in Gandhidham in Gujarat. On 10-8-2005 WHO declared that Pandemic is over and cases will continue for years to come.

From 2009 to 2013 total 58690 cases & 3907 deaths were reported in India including 3526 cases & 720 deaths in Gujarat. Only 162 cases & 56 deaths were reported in Gujarat during 2014.

This year in 2015 there is high transmission of influenza in North hemisphere including USA were millions of people take Flu shot in mass vaccines program.

Since 1st January 2015 rising trend is observed mainly in Rajashthan, Gujarat, Maharashtra, Telangana, Delhi and Tamilnadu states in India. As on 18-2-15 total 2191 cases & 167 deaths have been reported in Gujarat. Cases have been reported practically from all districts but mainly from Kutch, Amdavad, Surat, Vadodara, Rajkot, Jamnagar, Anand.

AGENT:

Influenza virus A, Influenza virus B, Influenza virus C are negative – sense ss-RNA viruses of Orthomyxoviridae family.

At present there are 3 Influenza prevalent at present in North hemisphere:

- a. Influenza A (H1N1) pdm09
 - i. Genetic sequencing shows a new sub type of influenza A (H1N1) virus reported from Mexico in 2009 with segments from four influenza viruses: North American Swine, North American Avian, Human Influenza and Eurasian Swine.
- b. Influenza A (H3N2)
- c. Influenza B

In USA minor mutation has been observed in Influenza A (H3N2) but in INDIA there are same viruses and changes have not been observed.

After beginning of pandemic in 2009-10 mild to moderate trend of transmission were reported in last 6 years. In 2011 there were only 75 cases & 11 deaths reported in our country. So it is difficult to predict behavior of virus and pattern of cases.

Host factors

The majority of these cases have occurred in high risk groups including pregnant mothers and in otherwise healthy young adults.

Individuals at extremes of age (Children < 2 years and elderly > 65 years of age) and with preexisting medical conditions like diabetes mellitus, obesity, bronchial asthma, COPD, thyroid disorders, cancer, cardiac, hepatic, renal or neurological illnesses, patients having organ transplantation and immune compromised conditions like HIV/AIDS or on long term corticosteroids etc. are at higher risk of complications, mortality and exacerbation of the underlying conditions.

Transmission

The transmission is by respiratory droplet infection and fomites.

Incubation period : 1-7 days.

Communicability

1. From 1 day before to 7 days after the onset of symptoms.
2. If illness persist for more than 7 days, chances of communicability may persist till resolution of illness.
3. After 24 hours of apyrexia (without use of antipyretics) virus shedding substantially reduces.
4. Children & immune suppressed person may spread the virus for a longer period.

Clinical features:

Important clinical features of influenza include fever, and upper respiratory symptoms such as cough and sore throat. Head ache, body ache, running nose, fatigue, abdominal pain, diarrhea and vomiting have also been observed.

Children may shows biphasic fever with aggravation of symptoms like abdominal pain, nausea, vomiting, diarrhea, dislike to take food, doesn't play, remain lethargic or drowsy etc.

• Pustules on tonsils requires antibiotics

• Only redness without pustules requires antiviral oseltamivir

Patients may progress from upper respiratory tract infection to pneumonitis, ARDS (acute respiratory distress syndrome) or MODS (Multiple organ dysfunction syndrome)

Complications observed are secondary bacterial pneumonia with or without sepsis, pneumothorax, hydropneumothorax, pneumo mediastinum, bronchiolitis, status asthmaticus, myocarditis, encephalitis, exacerbation of underlying conditions etc.

Investigations:

Routine:

Usually routine investigations may show leucopenia with lymphocytosis with minimal thrombocytopenia with raised CRP & SGPT. Leukocytosis is common after secondary bacterial infection. Unexplained anemia (without Bleeding) with low albumin level has poor prognostic value.

Confirmation of diagnosis is obtained by Real time RT PCR positivity in throat swab.

Government of Gujarat has started FREE Influenza testing facilities FOR GOVERNMENT & PRIVATE PATIENTS in Microbiology departments of 5 government medical college hospitals namely Civil hospital, Amdavad; GMERS Medical College Hospital, Sola, Amdavad; Civil hospital, Surat; Civil hospital, Rajkot & GK general hospital, Bhuj. Only one private laboratory has come forward and permitted for testing.

As per Government of India Guidelines categorization, testing policy & treatment guidelines are strictly followed. Morbidity & mortality data should not be compared among states as there is no uniformity in testing policies, facilities and reporting at national level.

Treatment:

The guiding principles are:

- ❖ Early implementation of infection control precautions to minimize nosocomial / household spread of disease
- ❖ Prompt treatment to prevent severe illness & death.
- ❖ Early identification and follow up of persons at risk.

OPD patients are managed in Influenza (Swine flu) OPD separately. They are categorized in A, B, C & managed as per GOI guidelines. (See annexure I)

Category A cases are treated symptomatically followed up regularly. Antiviral treatment is started in Category B without testing and without awaiting throat swab results in Category C cases. Follow up of cases is advised at 24 or 48 hours interval to keep watch on clinical progress.

Home Care for Category A & B Patient:

- ❖ Be informed about the illness during screening.
- ❖ Stay home, preferably isolate himself / herself in a well ventilated room till 24 hours of apyrexia (without anti pyretic).
- ❖ Avoid common areas frequented by other members of the family.
- ❖ If the living space is small and more than one person need to sleep in a room, ensure that the head end of patient and others sleeping in that room are in opposite direction (head to toe).
- ❖ Wear mask (Preferably Three layered surgical mask) all the time. If mask is not readily available, mouth and nose should be covered with a piece of cloth/handkerchief.
- ❖ Masks, tissue papers should be disposed in dustbins.
- ❖ Utensils used by the cases should not be used by other person
- ❖ The contact surfaces would be disinfected by wiping, with sodium hypochlorite solution or house hold bleach (5%) solution.
- ❖ Avoid smoking.
- ❖ Avoid close contact with others. If inevitable, they should always maintain 1 meter distance
- ❖ Avoid having visitors.
- ❖ Avoid going into the community, school, office, markets.
- ❖ Maintain respiratory hygiene, cough etiquettes & Wash hands frequently. Advised to spit in cup & not in open area
- ❖ Self monitor health and report to identified health facility in case of worsening of symptoms.

Treatment:

- ❖ Patient should take rest, avoid exertion, do warm saline gargles and to take plenty of liquids orally.
- ❖ Give Paracetamol for fever >101 F and ibuprofen for myalgia. Do not give round the clock antipyretic/anti inflammatory drugs.

- ❖ Aspirin should be avoided.
- ❖ Oseltamivir to be started preferably within 48 hours in category B cases.
 - Antiviral drug Oseltamivir is effective against all 3 prevalent influenza strains
 - Oseltamivir resistance is not reported in our country.
 - Availability of Oseltamivir can be searched from www.xinindia.gov.in

Dose for Oseltamivir is as follows:

By Weight:

- ❖ For weight <15kg 30 mg BD for 5 days
- ❖ 15-23kg 45 mg BD for 5 days
- ❖ 24-<40kg 60 mg BD for 5 days
- ❖ >40kg 75 mg BD for 5 days

For infants:

- ❖ <3 months 12 mg BD for 5 days
- ❖ 3-5 months 20 mg BD for 5 days
- ❖ 6-11 months 25 mg BD for 5 days

- ❖ Zanamivir is available in inhaler form having same mechanism of action like Oseltamivir. 2 inhalations (5 mg each), twice daily for Age 7 years.
- ❖ Injectable zanamavir & piramivir is available abroad.

Early warning signs: Patients advised home care should look for:

- ❖ Fever not responding & remaining high
- ❖ There is difficulty in breathing or chest pain
- ❖ Coughing of blood tinged sputum
- ❖ Sensorium gets altered with change of behaviour
- ❖ Children having fast respiratory rate, seizures, vomiting, irritability and not taking food
- ❖ Patients with high risk conditions needs observation for deterioration

Management of Category C cases:

Infrastructure/ manpower / material support

Category C cases are to be managed in isolation wards with ICU facilities (4 separate areas for suspected / positive & stable / critical cases groups). Dedicated staff is required to attend such cases. They have to wear PPE (Personal Protective Equipments) & practice universal precaution. They should be motivated for voluntary influenza vaccination.

Portable X-rays, ultrasonography, echocardiography are carried out within isolation wards. Dialysis and even normal delivery is conducted in isolation wards.

Only for LSCS or CT scan patient is to taken out from isolation wards

Standard Operating Procedures:

- ❖ Restrict number of visitors and provide them with PPE
- ❖ Reinforce standard infection control precautions:
 - N-95 mask are to be used by health care provider visiting within 1 meter area or where aerosol generating procedures are going on
 - Three layer mask is to be used by rest
- ❖ Dispose waste safely

Oseltamivir Medication

- ❖ Double doses may be given for 5/10/15 days or more if there are no adverse effects.
- ❖ **Prophylactic use** of oseltamivir & other antiviral drug in all contacts should be discouraged. Contacts have to observe themselves for development of symptoms and immediately consult doctors for further treatment.

Antibiotics- To be used as per hospital antibiotic policy & culture - sensitivity reports

- Piperacillin + Tezobactam
- Augmentin
- Azithromycin
- Levofloxacin
- Linezolid
- Vancomycin
- Ceftriaxone

Supportive therapy & critical care

- ❖ IV Fluids.
- ❖ Parenteral nutrition.
- ❖ Oxygen therapy/ ventilatory support.
- ❖ Vasopressors for shock. Low dose steroid may be used in refractory hypotension
- ❖ Maintain hydration, electrolyte balance and nutrition
- ❖ Patients with signs of tachypnea, dyspnea, respiratory distress and oxygen saturation less than 90 per cent should be supplemented with oxygen therapy.
 - Types of oxygen devices depend on the severity of hypoxic conditions which can be started from oxygen cannula, simple mask, partial re-breathing mask (mask with reservoir bag) and non re-breathing mask.
 - In children, oxygen hood or head boxes can be used.

- ❖ Non invasive ventilation is better option for acute lung injury stage. It is an aerosol generating procedure so proper infection control practice should be strictly observed.
- ❖ Patients with severe pneumonia and acute respiratory failure (SpO₂ < 90% and PaO₂ < 60 mmHg with oxygen therapy) should be supported with mechanical ventilation. (Cut off level for pregnant women is SpO₂ < 95%)
- ❖ Relatives should be motivated for consent for early elective tracheostomy as it reduces dead space and suction is more effective.
- ❖ Role of chest physiotherapy is vital
- ❖ ECMO (extra corporeal membrane oxygenation) therapy is tried in few patients. It is very costly treatment.

Discharge Policy:

- ❖ If the laboratory reports are negative, the patient would be discharged after giving full course of Oseltamivir from step down unit.
- ❖ A treated and recovered patient, even though testing positive, has very little possibility of infecting others.
- ❖ Patients who responded to treatment after two to three days and become totally asymptomatic should be discharged after 5 days of treatment. There is no need for a repeat test.
- ❖ Patients who continue to have symptoms of fever, sore throat etc. even on the 5th day should continue treatment for 5 more days.
- ❖ For patients who continue to be symptomatic even after 10 days of treatment or those cases with respiratory distress and in whom secondary infection is taken care of, the dose of anti viral may be adjusted on case to case basis.

Dead body care:

Minimum number of people should attend funeral of deceased cases and rituals like washing of dead body to be avoided.

Vaccine: Trivalent Influenza vaccine for north hemisphere for year 2014-15

1. For 0-6 months of age group there is no vaccine
2. Vaccine is to be taken only after consulting doctor
3. Injectable & nasal form of vaccine are available
4. WHO does not recommend mass vaccination
5. Health care workers serving Influenza cases especially critical cases are encouraged to take vaccine voluntarily
6. High risk groups including pregnant women may take injectable form of vaccine
7. Effect of vaccine begins after ~2 weeks
8. Vaccination does not give 100% protection
9. Universal precaution and strict hospital infection control practice needs to be strictly observed even if you are vaccinated.

ANNEXURE I

Ministry of Health & Family Welfare

Pandemic Influenza A (H1N1)

Guidelines on categorization of Influenza A H1N1 cases during screening for home isolation, testing treatment, and hospitalization

(Revised on 05.10.09)

In order to prevent and contain outbreak of Influenza-A H1N1 virus for screening, testing and isolation following guidelines are to be followed:

At first all individuals seeking consultations for flu like symptoms should be screened at healthcare facilities both Government and private or examined by a doctor and these will be categorized as under:

Category-A

Patients **with mild fever plus cough / sore throat** with or without body ache, headache, diarrhoea and vomiting will be categorized as Category-A. They **do not require** Oseltamivir and should be treated for the symptoms mentioned above. The patients should be monitored for their progress and reassessed at 24 to 48 hours by the doctor.

- No testing of the patient for H1N1 is required.**
- Patients should confine themselves at home and avoid mixing up with public and high risk members in the family.

Category-B

- (i) In addition to all the signs and symptoms mentioned under Category-A, if the patient has high grade fever and severe sore throat, may require home isolation and Oseltamivir;
- (ii) In addition to all the signs and symptoms mentioned under Category-A, individuals having one or more of the following high risk conditions shall be treated with Oseltamivir:

- Children with mild illness but with predisposing risk factors.
- Pregnant women;
- Persons aged 65 years or older
- Patients with lung diseases, heart disease, liver disease, kidney disease, blood disorders, diabetes, neurological disorders, cancer and HIV/AIDS
- Patients on long term cortisone therapy

No tests for H1N1 is required for Category-B (i) and (ii).

- All patients of Category-B (i) and (ii) should confine themselves at home and avoid mixing with public and high risk members in the family.

Category-C

In addition to the above signs and symptoms of Category-A and B, if the patient has one or more of the following:

- Breathlessness, chest pain, drowsiness, fall in blood pressure, sputum mixed with blood, bluish discolouration of nails;
- Children with influenza like illness who had a severe disease as manifested by the red flag signs (Somnolence, high and persistent fever, inability to feed well, convulsions, shortness of breath, difficulty in breathing, etc).
- Worsening of underlying chronic conditions.

All these patients mentioned above in Category-C require testing, immediate hospitalization and treatment.

REPORT OF SWINE FLU

Following branches have arranged the awareness programme on Swine Flu as per the guide line given by Health and Family Welfare Department, Govt. of Gujarat

Ahmedabad	12/02/2015
Amreli	12/02/2015
Bhavnagar	16/02/2015
Bhujkutchh	30/01/2015
Jamnagar	29/01/2015
Lunawada	06/02/2015
Palitana	02/02/2015

Many more branches of Indian Medical Association, Gujarat State Branch have arranged the seminar, but office is yet to receive the report.

National President
Prof. Dr A Marthanda Pillai
Padma Shri Awardee
09847062019 | dramp2014@gmail.com

Honorary Secretary General
Prof. Dr K K Aggarwal
Padma Shri, National Science Communication &
Dr B C Roy National Awardee
09811090206 | hsgima@gmail.com

Dear Colleague,

IMA and Ministry of Health and Family Welfare, Govt. of India has come out with certain guidelines regarding the Swine Flu. Kindly go through them and make sure that when any one of you addresses the Local Press, the IMA guidelines are adhered too and there is uniformity in IMA statements.

With kind regards,

Prof Dr A Marthanda Pillai

Prof Dr K K Aggarwal

IMA-Ministry of Health & Family Welfare (MoH) Advisory for General Public on Vaccination with Seasonal Influenza A; (H1N1) Vaccine

We are in the middle of an outbreak of Seasonal Influenza A H1N1. Government has recommended Influenza vaccine for High Risk Group of Health Care Workers working in close proximity to influenza patients. This includes Health Care Workers working in casualty/ emergency department of identified hospitals treating Influenza cases; those working in ICU and Isolation Wards managing influenza patients; those identified to work in screening centres set up for categorization of patients, etc. as they are liable to constant exposure to the virus.

The vaccine is not recommended for the general public, at this juncture, as a public health strategy and the Government is keeping a close watch on the situation.

Public is encouraged to take precautions for prevention such as frequent washing of hands, covering up your coughs and sneezes with tissue paper staying away from crowded places and from those showing symptoms of influenza, avoiding contact greetings are all appropriate measures. If one is having symptoms of Influenza, he should immediately attend the nearest health facility for early diagnosis and treatment.

Patients on reaching hospital should be provided Three Layered Surgical Mask to prevent spread of infection to others. Three layered surgical mask or N-95 Respirator Masks are not required for the patient's relatives.

IMA-MoH Guidelines on Chemoprophylaxis

Chemoprophylaxis with oseltamivir either for short duration (10 days) or of long duration (42 days) protect the individual till such time he is on Chemoprophylaxis. In a community where there is rampant spread of pandemic Influenza A H1N1, the risk of getting the infection exists the moment a person is taken off Chemoprophylaxis. As prophylaxis cannot be continued in perpetuity, the following recommended:

- If the States qualify the criteria for community spread, then Chemoprophylaxis would only be provided to family contacts that are at high risk and especially those with comorbid condition.
- The prophylaxis to the high risk family contact would be provided irrespective of laboratory testing i.e. any high risk contact of patients in category A, B or C would be provided Chemoprophylaxis.
- The doctors screening the patients and categorizing them as A,B,C would invariably take the history of high risk contacts among the family members of these suspect cases and persuade them to attend screening centres.
- Irrespective of whether there is a community spread or not medical personnel attending to influenza A H1N1 cases in dedicated treatment facilities would be put on Chemoprophylaxis to a maximum of 42 days.

IMA- MoH Guidelines on categorization of Seasonal Influenza A H1N1 cases during screening for home isolation, testing, treatment and hospitalization (Revised on 11.02.2015)

In order to prevent and contain outbreak of Influenza-A H1N1 virus for screening, testing and isolation following guidelines are to be followed:

At first all individuals seeking consultations for flu like symptoms should be screened at healthcare facilities both Government and private of examined by a doctor and these will be categorized as under:

Category-A

- Patient with mild fever plus cough / sore throat with or without bodyache, headache, diarrhea and vomiting will be categorized as Category-A. They do not require Oseltamivir and should be treated for the symptoms mentioned above. The patients should be monitored for their progress and reassessed at 24 to 28 hours by the doctor.
- **No test of the patient for H1NO is required.**
- Patients should confine themselves at home and avoid mixing up with public and high risk members in the family.

Category-B

1. In addition to all the signs and symptoms mentioned under Category-A, if the patient has high grade fever and severe sore throat, may require home isolation and Oseltamivir;
2. In addition to all the signs and symptoms mentioned under Category-A, individuals having one or more of the following high risk conditions shall be treated with Oseltamivir:
 - Children with mild illness but with predisposing risk factors.
 - Pregnant women;
 - Persons aged 65 years or older;
 - Patients with lung diseases, heart disease, liver disease, kidney disease, blood disorders, diabetes, neurological disorders, cancer and HIV/AIDS;
 - Patients on long term cortisone therapy.
 - No tests for H1N1 is required for Category-B (i) and (ii).
 - All patients of Category-B (i) and (ii) should confine themselves at home and avoid mixing with public and high risk members in the family.
 - Broad Spectrum antibiotics as per the Guidelines for Community-acquired pneumonia (CAP) may be prescribed.

Category-C

In Addition to the above signs and symptoms of Category-A and B, if the patient has one or more of the following:

- Breathlessness, chest pain, drowsiness, fall in blood pressure, sputum mixed with blood, bluish discolouration of nails;
- Children with influenza like illness who had a severe disease as manifested by the red flag signs (Somnolence, high and persistent fever, inability to feed well, convulsions, shortness of breath, difficulty in breathing, etc.)
- Worsening of underlying chronic conditions.

All these patients mentioned above in Category-C require testing, immediate hospitalization and treatment

IMA- MoH Guidelines on Seasonal Influenza A (H1N1): Guidelines for Vaccination of Health Care Workers (Updated on 14th February 2015)

1. World Health Organization recommends vaccination of high risk groups with Seasonal Influenza Vaccination.
2. In India, neither the actual disease burden of Influenza, nor differentials on the way influenza impacts high risk groups are known. Hence, evidence based decision is not possible for all high risk groups.
3. Health Care Workers working in close proximity to influenza patients are at higher risk of acquiring the disease. Hence, vaccination is recommended for them. Such category would include:
 - Health Care Workers working in casualty/ emergency department of identified hospitals treating Influenza cases.
 - Health Care Workers working in ICU and Isolation Wards managing influenza patients
 - Health Care Workers identified to work in screening centres that would be set up for categorization of patients during Seasonal Influenza outbreak.
 - Health Care workers treating/managing the High Risk Group
 - Laboratory personnel working in virological laboratories testing Influenza samples.
 - Rapid Response Team members identified to investigate outbreaks of Influenza.
 - Drivers and staff of vehicles/ambulances involved in transfer of Influenza patients.
4. The vaccine should be used every year.
5. Influenza vaccination is most effective when circulating viruses are well-matched with vaccine viruses. Even with appropriate matching, efficacy of vaccine may be about 70% to 80%, especially in geriatric age group. In case the locally circulating virus is different from vaccine virus recommended by WHO, it may not be effective at all. Hence, vaccine should not give a false sense of security. Considering the risk perspective, the preventive modality of infection prevention and control practices like use of PPEs should be strictly adhered to. The available vaccine takes about 2-3 weeks for development of immunity. The use of chemoprophylaxis during this period may be considered.

Dear Collegaue

There is shortage of flu vaccine in the country. Its expected in any outbreak. Every country has faced the same.

We should be carefull while recommending the same to our patients or making a statement to the press.

We had a meeting with the ministry and the current stand was to limit its indications to the health care provider at risk of H1N1 and not recommend it to the general public.

Most imporatnt are precautions. Those exposed and at high risk should be given chemoprophylaxis and not vaccine.

Vaccine in any way will take upto three weeks to provide protection.

Also debate the Interantionl literature about Half-Dose Influenza Vaccine in view of the shortage of the vaccine. It is not IMA recommendation at the moment but can be considerd on case to case basis.

Some facts

1. From a public health standpoint, it would be better to vaccinate many people with lower doses than fewer people with full doses when vaccine supplies are scarce
2. A study published in 2009 in Archives of Internal Medicine has shown that half dose flu shots are effective in adults, especially in women and those younger than 50, and offer a viable way to stretch supplies during vaccine shortages.
3. Earlier in June 2000, a NIAID conducted trial, published in journal Vaccine concluded that the immune responses to the full dose were higher, on average, than immune responses to the half dose vaccine but should a public health emergency arise, half-dose influenza vaccines for healthy adults might be an acceptable strategy if the vaccine supply is substantially limited.

With Kind and warm regards

Dr A. Marthanda Pillai and Dr K. K. Aggarwal

મહેસાણા | વર્લ્ડ મેડિકલ એસોસિયેશનના પ્રમુખ સર મિચેલ માર્મોટ અને ડો. કેતનભાઈ દેસાઈ આગામી 14મી ફેબ્રુઆરીના રોજ ઇન્ડિયન મેડિકલ એસોસિયેશન દ્વારા બનાસકાંઠા જિલ્લાના દત્તક લેવમાં આવેલા ગામની મુલાકાત લેનાર છે. આ માટે મિચેલ માર્મોટ અમદાવાદથી પાલનપુર જવાના છે ત્યારે ઇન્ડિયન મેડિકલ એસોસિયેશનની મહેસાણા, વિસનગર, વિજાપુર અને હિંમતનગરની ધ્રાવ્ય દ્વારા મહેસાણાની દૂધસાગર ડેરીના પ્રાંગણમાં બપોરે ત્રણ વાગ્યે તેમનું સન્માન કરવામાં આવશે.

વર્લ્ડ મેડિકલ એસો.ના પ્રમુખ સિદ્ધપુરમાં

સિદ્ધપુર | વર્લ્ડ મેડિકલ એસો.ના 2016ના પ્રમુખ તરીકે ગુજરાતના ડો. કેતન દેસાઈની વરણી કરાઈ છે. શનીવારે એસો.પ્રમુખ સર માઇકલ મોર્મોટ અને ડો.દેસાઈનો સત્કાર કાર્યક્રમ અત્રે યોજાયો હતો. જેમાં ડો.મોર્મોટે ગુજરાતની સંસ્કૃતીથી પ્રભાવિત થયાનું જણાવ્યું હતું. જયારે પ્રથમ ગુજરાતી પ્રમુખ તરીકે વરણી થયાની આનંદની લાગણી ડો. દેસાઈએ વ્યક્ત કરી હતી. કાર્યક્રમમાં સિદ્ધપુરના ડો.અતુલ મેવાડાએ આવકાર આપ્યો હતો.

Report of 1st State Programme - MEDICINE AND LAW

One day Seminar on Law for Doctors was organised by IMA, GSB at GMERS Medical College, Gotri, Vadodara on 1st February, 2015.

Inaugurating the programme, President of IMA, GSB Dr. Chetan Patel stated the more such state level programmes on topics like Avoid Antibiotic Abuse, Accreditation, Pharmacovigilance etc. are in pipe line. Dr. Mansukh Kanani, Vice President, IMA HQ was the guest of Honour. Dr. Jitendra N. Patel, Hon. State Secretary and Dr. Lalit Nayak, Secretary IMA CGP were also present.

Talking on Consent, eminent Supreme Court Counsel Dr. Mahendrakumar Bajpai stressed on proper documentation. He specified that when relatives do not give consent, the same must be entered in the case paper. Elements on consent were discussed by Dr. Rajendra Parikh, Professor of Law from Faculty of Law, The MS University of Baroda.

Dr. Mahesh Baldwa, noted Medico Legal expert and senior Pediatrician from Mumbai deliberated on Medical Negligence. He quoted several case laws and with examples explained about approaches to various critical situations from medico-legal point of view.

Very interesting debate on issue of certificate of death for patient brought dead kept the audience spell bound. Participants included Dr. Uday Purandare and Dr. Vijay Shah both Profesors of Forensic Medicine. The debate was moderated by Dr. Ashok Mehta, Previous Jury member of Consumer Forum.

After noon session on Criminal aspects of negligence was conducted by Dr. Arun Mishra in his authoritative style. Quoting Indian Penal Code and Criminal Procedure Code, he gave several inputs on how to represent to Courts and to police.

Mr. Prakash Lohana, well known finance consultant deliberated on need to make will. He stated that in case a male dies without making a will, his living father can not inherit any of the property of son.

A group of students doing articleship with CA firm presented rights of person during survey, search and seizure activities by Income Tax authorities. Later CA Mr. Nirav Shah gave further details on how Income Tax department collects information and how assesses can use their rights. Delegates received many important hints and information on Law from all faculty.

Dr. Bakulesh Chauhan
Hon. Secretary

Dr. Atulkumar Shah
President

Indian Medical Association Vadodara Branch

Feedback : Seminar on law for Doctors

Dear Dr. Chetan Patel, President and Secretary IMA Vadodara

Although late but it is never too late to appreciate the Nice Deeds. At the outset, I congratulate you and Team IMA Vadodara for organizing such a wonderful conference of " Seminar on Law for Doctors " on 1st Feb 15 at Vadodara. It was an eye opener for the practicing doctors because we, clinicians, always think of patient's treatment part and we forget Legality part of the case. Speakers were experts in their respective field. Although there was difference in opinion in certain issues but by en large we got Carry-Home message.

Above all the play of Mock IT Survey, well enacted by youngsters, was like icing on cake.

Only negative factor which I felt, was some speakers were openly marketing themselves, which is a side effect of profession, and which can be taken care in future programmes.

BUT overall it was a well organized, well executed and well managed event and I would suggest such programmes should be done in other areas of Gujarat state also so that our fellow colleagues are benefited.

LONG LIVE IMA! JAI HIND. JAI GUJARAT.

Dr. Kailesh M. Bhandari,
Ohm Clinic, Chhani. Vadodara.

HUMOUR IN MEDICINE

With American becoming more and more stagnant this one says it best.

"What fits your busy schedule better, exercising one hour a day or being dead 24 hours a day?"

Games Corner

Dr. Chandresh Jardosh
Surat

Chhota Sudoku

"Place the numbers 1 to 9 in the spaces so that the number in each circle is equal to the sum of the four surrounding spaces."

7 BR OK EN Words

By using following keys, join the broken words & find out the 7 different languages.

Key	Words
4 Letters	1
5 Letters	2
6 Letters	1
7 Letters	1
8 Letters	2

NN	GU	IT	UR	TI
RA	TA	SA	HI	AD
RA	DU	MA	JA	KR
NDI	NS	KA	MK	THI

Sudoku

	7						
		8		6		5	
	3	9					4 8
	8		5			4	
7				9			3
		2					8 7
5	2			3		7	6
		4		7		3	

The objective of sudoku is to enter a digit from 1 through 9 in each cell, in such a way that:
 Each horizontal row contains each digit exactly once
 Each vertical column contains each digit exactly once
 Each 3 by 3 square contains each digit exactly once

KEN KEN PUZZLE

1200x				6x	
				20x	48x
10x	24x				
				15x	

1 write down 1 to 5 in each row and each column in such a way they come only once, in each row and column.

2 The heavily-outlined groups of squares in each grid are called "cages." In the upper-left corner of each cage, there is a "target number" and a math operation (+, -, x, ÷).

3 Fill in each square of a cage with a number. The numbers in a cage must combine—in any order, using only that cage's math operation—to form that cage's target number.

FOR EXAMPLE

3+	1	2	
6x	1	2	3

4 The number written in the cage of one square, will be the answer for the cage.

5 Important: You may not repeat a number in any row or column. You can repeat a number within a cage, as long as those repeated numbers are not in the same row or column.
