**STATE PRESIDENT'S MESSAGE**

Respected Members,
Season's Greetings !!

Hope you all are in pink of your health and spirit.

Luckily, Third wave of Covid-19 had caused less mobility & mortality. Still we have to take precautions with precautionary dose of available brand of Covid Vaccine & SMS.

It is our moral duty to encourage our patients & citizens coming in our contact to take this precautionary dose of vaccine; as per government guideline & as and when available for that age groups.

IMA leadership at head quarters was very concerned on the issue of proposal of NMC to change the medical oath form "Hippocratic" to charak". Constant Consultations, discussions & careful examination of all the aspects, were being studied diligently, so as to come out with a studied and considerate response. Urgent meeting of office bearers & Leaders of IMA was held under Leadership of **National President Dr. Sahajanand Prasad Singh**. It was decided to strongly oppose the said proposal & every possible ways will be taken to withdraw this proposal. Be ready for the line of action as and when our head quarter announce it.

Recently, we have observed that many Undergraduate ; Post Graduate and Super Specialty Medical, seats remains vacant ; even after multiple rounds of counselling. This shows that there is some lacune in system and need to make changes in rules of this admission criteria.

At one hand ; we want to increase the medical UG & PG seats & Medical Colleges at each district level, thinking of shortage of Medical Professionals. On other hand, we disqualify a student who has appeared

many Exams & Worked for the patients. Government & concerned authorities needs to introspect & take necessary steps and see to it that all seats doesn't remain vacant . Although such vacant seats are from Anatomy, Biochemistry, Physiology, Pharmacology & other Non Clinical Branches, we need all this specialists also for better education of our UG students. Government / NMC has to see that this seats does not remain vacant any how .

We have observed many medical students leave this country for PG Medical Education. Government/ NMC has to seriously think over this brain drain. There may be many reasons but high cost of medical & PG Medical Education in our country, lack of opportunity to work independently, violence on Medical Professionals by Antisocial Elements, Poor Job Opportunity ; very poor salary structure for MBBS and Specialist doctors in our country ; lack of Social Security, No Human Rights for Resident Doctors at Medical colleges, Lack of men power at Govt. Hospitals, harassment by Seniors & Authorities, interference by beurocrates in Medical Professional decisions etc. Are some of the reasons of such brain drain. Time has arrived to cater this issues urgently & prevent brain drain.

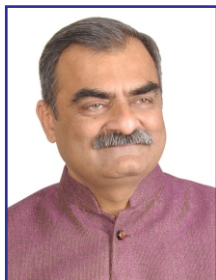

Be prepared & let us observe and celebrate, upcoming International Women's Day on 7th Feb, World TB Day on 24 March ; WHO Day on 7th April, Safe Motherhood Day on 11th April & International Family Day on 15th May.

Take Care & Be Safe.

Jay Hind!!

Long live IMA !!

Dr. Paresh M. Majmudar
(President, G.S.B.,I.M.A.)

**HON. STATE SECRETARY'S MESSAGE**

Dear Members

The world has been caught in the throes of the Covid pandemic for the past two years and is slowly rising from the embers. Life has returned to normalcy with one or two hiccups still persisting. The Covid virus is still giving jitters

with a sudden spurt in in cases though in its mildest forms. The virus seems to be dying a slow death.

Can we say the same for Tuberculosis? For more than 100 years, the epidemic has been raging across the globe, especially in the developing and underdeveloped countries. As per data, Tuberculosis is the leading cause of death world-wide since many years.

So, it seems apt that we should now concentrate our energies on such diseases which are yet to be eradicated from the universe. Thanks to relentless efforts by the Government and International organizations, TB has been brought under a lot of control. To commemorate the identification of the virus, the WHO has identified **March 24th as World TB day**. We hope to host a plethora of events to help in increasing awareness about the disease and help in treatment and eradication of the disease also. Mark the day on your calendar and be a part of a universal revolution

Another important day that is round the corner is **International Women's Day**. It is celebrated across the globe on 8th March. There is a perennial issue that keeps raising its head regularly. Women empowerment. It is all about promoting women's sense of

self-worth, their ability to determine their own choices, and their right to influence social change for themselves and others. It becomes our fundamental right to raise the status of women through education, awareness, literacy, training and Now "Break the Bias".

To bring women empowerment into the rural parts of India is imperative as it helps in raising the self-esteem of the person, making them independent and self-sufficient as well as raising their quality of life. Gender equality is subservient to the need of the hour. Need we say that in today's world, women have crossed the altars at home and have cocooned themselves comfortably in all the spheres of life.

Recent surveys suggest women to be better entrepreneurs and their managerial abilities are highly applauded. Let's hope with women's empowerment, the world becomes a gender equal place and equal rights are shared by one and all.

Let us join hands and unite ourselves to be a part of a global revolution – whether to ring in the change the world wants to see through women empowerment and be the torchbearer in eradicating a life-threatening disease like Tuberculosis.

***"What lies behind us and what lies before us are
tiny matters compared to what lies within us."***

- 22-1-2022 Kakubhai Parikh School Gandhidham: 38 units were collected.
- 26-1-2022 You and Me foundation, Gandhidham: 74 units were collected.
- 22-12-2021 Thallesemia detection camp was held at tolani commerce college adipur in which 1617 samples were collected which was a record collection of samples with help of redcross soc. Ahmedabad. Supported by Lions club of new horizon Gandhidham.

KALOL

- 17-12-2021 CME on "Recent Advance in Cancer Surgery" by Dr. Bhavin Vadodariya.
- "Radiation Oncology where are we now." by Dr. Samarendra Dash.
- 02-01-2022 Friendly Cricket match between enthusiastic players of IMA Kalol member.

MEHSANA

- 30&31-1-2022 IMA Mehsana Branch Volleyball Team A won Championship Trophy & Team B won Runner-up Trophy in Gujrat State IMA Volleyball Championship Tournament hosted by IMA Dahod at Dahod.
- IMA Mehsana Volleyball Team C won Silver Cup Trophy in the same tournament

**MORBI**

02-01-2022 Free diagnostic camp at Shree Dasha Shreemali Vanik Vadi by Lions Club and HCG Super Specialty Hospital by help of IMA Morbi. Total 400 patients were benefited.

Free Diagnostic camp at Sony Samaj Vadi by ward No. 5 and IMA Morbi. Total 400 patients were benefited.

Free Blood Sugar Check up camp at Narasag Temple, Ravapar Road, Morbi. By procure lab with IMA Morbi.

Talk about diabetes by Dr. Prakash Vidja to raise awareness among community. Total 106 patients were benefited.

Talk about Nutrition in children by Dr. Jaydeep Patel at Nest School, Vavdi.

03-01-2022 Talk about Morbi update by Dr. Manish Sanariya and Dr. Piyush Malasna about Corona Disease, Vaccination, Prevention, Care and Treatment.

07-01-2022 "Interesting cases in Rheumatology" by Dr. Ishita Shah.

09-01-2022 Free Diagnostic camp at Dhakka Vali Meldi Mata Temple. Total 528 patients were benefited.

Free camp on Bone Marrow Density test (To prevent Osteoporosis) by Dr. Yogesh Pethapara at Maruti Ortho. Hospital. Total 225 patients were benefited.

14-01-2022 Installation of new Team of AOP at Dr. Boda Sir Farm House. All family AOP members were present.

26-01-2022 Free Diagnostic Camp about IVF and Test Tube Baby guidance given by Dr. Swati Patel at Mayan Hospital.

Republic day. Flag unfurling ceremony at IMA Hall.

IMA Sports Day at Nalanda day and Residential school, Morbi Rajkot Highway. Total 160 IMA Family Members participated.

RAJKOT

21-12-2021 CME with Shalby Hospital.

25-12-2021 Health Check up camp on occasion of Shree Atal Bihari Vajpeyi Jayanti.

- 1 & 2-01-2022 Cricket tournament for IMA Members.
- 07-01-2022 Webinar Lokdarbar-3, Dr Mehul Shah, Dr. Paresh Majmudar Dr. Prashant Trivedi, Dr. Chirag Matravadiya, Dr. Jayesh Dobariya, Dr. Mayank Thakkar, Dr. Tushar Patel, Dr. Tejash Karamta, Dr. Sankalp Vanzara, Dr. Jay Dhirwani, Dr. Samir Thakrar, Dr. Paras Shah, Dr. Sanjay Bhatt was live on face book
- 09-01-2022 Health Check up camp at Sadbhavna Vruddhashram as a part of IMA GSB activity.

VADODARA

- 22-11-2021 Organ Donation Drive in 100+ hospitals which are having ICU beds.
- 00-11-2021 IMA Vadodara team members meet the representative from AIDS Control Society. For finalize the educational programme for the doctors.
- 26-12-2021 IMA Vadodara organised opening ceremony of IMA Cricket Tournament

Breast Cancer : Screening and Prevention

Out of all the types of cancers, breast cancer has become a major health concern across India. It is the most common form of cancer affecting women in India. Breast cancer is a disease in which cells in the breast grow out of control due to several reasons. Recent report published by National Cancer Registry Programme (NCRP) estimates that the number of cancer cases is likely to increase from 13.9 lakh in 2020 to 15.7 lakh by 2025, an increase of nearly 20%.

Breast cancer in India is more often seen in the younger age group compared to Western population. There is also a higher incidence of a more aggressive type such as the Triple-negative breast cancer in the Indian population. Although, the estimated number of new breast cancer cases diagnosed in the USA is 1.6 times those diagnosed in India in the year 2020, the estimated number of deaths due to Breast Cancer in India is twice the deaths in the USA.

Breast cancer accounts for second most common cancers in Indian women. It is reported that with every four minutes, an Indian woman is diagnosed with breast cancer. Breast cancer is on the rise, both in rural and urban India.

Breast cancer can spread outside the breast through blood vessels and lymph vessels. When breast cancer spreads to other parts of the body, it is said to have metastasized. The most common kinds of breast cancer are Invasive ductal carcinoma and Invasive lobular carcinoma.

All women can get breast cancer. Although the causes of breast cancer are still unknown, there are some factors that may increase women's chances of getting the disease:

- Getting older - Most women the world over are diagnosed over 60 years of age
- Having a first menstrual period at a young age (younger than 12 years)
- Starting menopause at an older age (older than 55 years)
- Never giving birth, or giving birth to a first child after age 30
- Not breastfeeding
- Having had breast cancer, or a close family member (mother, sister, father, daughter) who has had breast cancer, especially early (pre-menopausal) breast cancer
- Having certain gene mutations such as BRCA 1 or BRCA 2
- Being overweight or obese
- Drinking excessive alcohol

- Not getting enough exercise
- Having a history of radiation exposure to the chest
- Taking hormone replacement therapy for an extended period of time.

Even if women have one or more of these risk factors, it does not mean they will get breast cancer. Also, many women who get breast cancer do not have any risk factors. This is why screening is important for all women. Women with a personal or family history (close family relative) of breast cancer may want to consider genetic counselling to find out if they are at greater risk for getting the disease.

While very rare, it is possible for men to get breast cancer. Symptoms of breast cancer in men are very similar to breast cancer in women.

Finding breast cancer early and getting state-of-the-art cancer treatment are two of the most important strategies for preventing deaths from breast cancer. Breast cancer that's found early, when it's small and has not spread, is easier to treat successfully. Getting regular screening tests is the most reliable way to find breast cancer early.

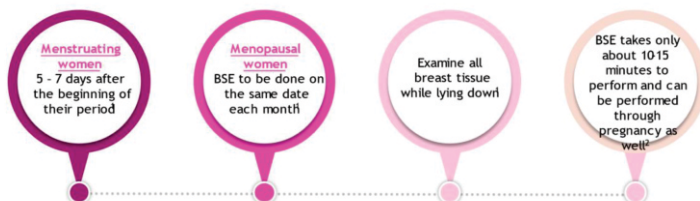

Screening refers to tests and exams used to find a disease in people who don't have any symptoms. The goal of screening tests for breast cancer is to find it early, before it causes symptoms (like a lump in the breast that can be felt). **Early detection** means finding and diagnosing a disease earlier than if you'd waited for symptoms to start.

Breast cancers found during screening exams are more likely to be smaller and less likely to have spread outside the breast. The size of a breast cancer and how far it has spread are some of the most important factors in predicting the **prognosis** (outlook) of a woman with this disease.

There are three modalities of Breast cancer screening to be done annually

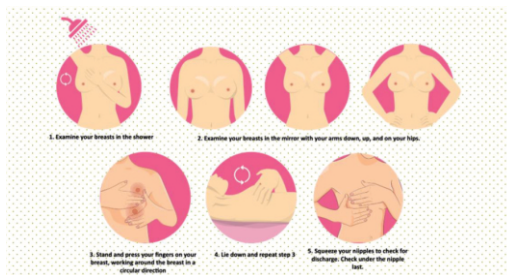

1. Self Breast examination
2. Mammography
3. Clinical breast examination

When to Self-Examine Breasts

Breast Self-Examination

Mammography is the most common screening test for breast cancer.

A mammogram is a picture of the inside of the breast. Mammography may find tumours that are too small to feel. It may also find ductal carcinoma in situ (DCIS).

There are different types of mammograms:

- Digital mammography is a computerised picture of the breast.
- Digital breast tomosynthesis (DBT) uses x-rays to take a series of pictures of the breast from many different angles. A computer is used to make 3-D pictures of the breast from these x-rays.
- Both these types of mammography machines are available in all leading cities.

Magnetic resonance imaging (MRI) may be used to occasionally screen women who have a high risk of breast cancer.

MRI is a procedure that uses a magnet, radio waves, and a computer to make a series of detailed pictures of areas inside the body. This procedure is also called nuclear magnetic resonance imaging (NMRI). MRI does not use any x-rays and the woman is not exposed to radiation. It is available only in certain centres of the country

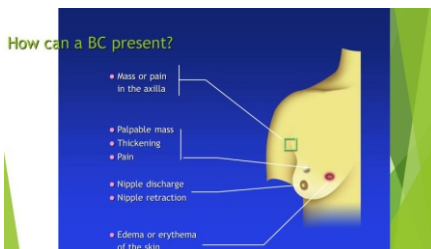

MRI may be used as a screening test for women who have a high risk of breast cancer.

Factors that put women at high risk include the following:

- Certain gene changes, such as changes in the BRCA1 or BRCA2 genes.
- A family history (first degree relative, such as a mother, daughter or sister) with breast cancer.
- Certain genetic syndromes, such as Li-Fraumeni or Cowden syndrome.

An MRI is more likely than mammography to find a breast mass that is not cancer such as fibrocystic disease of breast etc

Women with dense breasts who have supplemental screening (for example, an MRI) show higher rates of breast cancer detection, but there is limited evidence about whether this leads to better health outcomes.

Clinical Breast Examination

A clinical breast exam is an examination of the breast by a doctor. It is recommended whenever there is a suspicious lump felt in the breast or axilla or if the mammogram shows an abnormal lesion. It is also recommended in patients with a strong family history of breast cancer.

Benefit of Screening

The benefit of screening is finding cancer early, when it's easier to treat.

Different kinds of cancer screening procedures have different risks, but if a test detects cancer, then that test result should also lead to options for early treatment and better survival option.

Thus, overall Early diagnosis and subsequent treatment will reduce the proportion of patients who are diagnosed at a late stage.

Prevention

Many factors over the course of a lifetime can influence breast cancer risk. Some factors can't change, such as getting older or family history, but the risk of breast cancer can be lowered by taking care of health in the following ways—

- Keep a healthy weight.
- Exercise regularly.
- Don't drink alcohol, or limit alcoholic drinks.
- If one is taking, or have been told to take, hormone replacement therapy or oral contraceptives (birth control pills), ask your doctor about the risks and find out if it is right for you.
- If one has a family history of breast cancer or inherited changes in BRCA1 and BRCA2 genes, talk to your Oncologist about other ways to lower your risk.

Staying healthy throughout life will lower one's risk of developing cancer, and improve chances of surviving cancer if it occurs.

Early detection is the key to long term survival

Dr. Babita Hapani, M.D, D.M (Oncology)
Medical Oncologist and Hemato-Oncologist,
Pragati Multispeciality Hospital, Rajkot

Overview of National Tuberculosis Elimination Programme(NTEP)

Case Definitions under NTEP

<u>Presumptive Pulmonary TB:</u>	<ul style="list-style-type: none"> • Cough > 2 weeks • Fever > 2 weeks • Significant weight loss, hemoptysis or • Any abnormality in chest radiograph.
<u>Probable TB:</u>	<ul style="list-style-type: none"> • No microbiological confirmation of tuberculosis • Strong clinical evidence of tuberculosis • X-ray/FNAC/Histopathological evidence of tuberculosis
<u>Confirmed Pulmonary TB:</u>	Biological specimen positive by: <ul style="list-style-type: none"> • Smear microscopy • Culture • Rapid molecular diagnostic tests (adapted by NTEP): Xpert MTB/Rif®/Truenat®.
<u>Presumptive Pediatric TB:</u>	Children with: <ul style="list-style-type: none"> • Persistent fever > 2 weeks • Cough > 2 weeks • Loss of weight/ no weight gain • Contact with active pulmonary TB cases
<u>Probable Pediatric TB:</u>	Children with: <ul style="list-style-type: none"> • No microbiological confirmation of TB • Abnormalities consistent with TB on radiography, • A history of exposure to pulmonary TB case • clinical findings suggestive of TB • Evidence of TB infection (positive TST)

Microbiological Methods of Diagnosis of TB under NTEP

1. Smear Microscopy (for AFB):

- Fluorescent staining

2. Rapid molecular diagnostic testing:

- Nucleic Acid Amplification Test (NAAT) Xpert MTB/Rif testing using GeneXpert system
- Chip based Treunat
- Line Probe Assay for MTB complex and detection of resistance to first line drugs (H,R) and second line drugs(FQ,SLI,Cfz,Lzd,Z).
- Whole Genome Sequencing (WGS)
- Next Gen Sequencing (NGS)

3. Culture:

- Automated Liquid culture systems e.g. BACTEC MGIT 960, BactiAlert or Versatrek
- Drug Sensitivity Testing : Modified PST for MGIT 960 system.
- Solid (LJ) media

Classification of TB

1. Based on anatomical site:

- **Pulmonary TB**
- **Extra pulmonary TB:** It refers to microbiologically confirmed or clinically diagnosed case of involving organs other than the lung such as lymph nodes, pleura, bones and joints, meninges of brain, intestine, genitourinary tract etc.

2. Based on treatment history:

- **New case:** A TB patient who has never had treatment for TB or has taken anti-TB treatment for less than one month is considered new case.
- **Previously treated case:** A patient who has received 1 month or more of anti TB treatment in the past.

3. Based on Drug Resistance:

- **Drug Sensitive TB:**
 - Microbiologically confirmed case
 - Sensitive to first line anti TB drugs
- **Drug Resistant TB:**

Isoniazid resistant TB (Hr-TB)	<ul style="list-style-type: none"> • Resistant to H • Susceptible to rifampicin
Mono-resistant TB (MR TB)	<ul style="list-style-type: none"> • Resistant to one first- line anti-TB drug only
Rifampicin resistant TB (RR-TB).	<ul style="list-style-type: none"> • Resistant to R • With or without resistance to other anti-TB drugs.
Poly-drug resistant TB (PDR-TB)	<ul style="list-style-type: none"> • Resistant to more than one first-line anti-TB drug other than both H and R.
Multidrug-resistant TB (MDR-TB)	<ul style="list-style-type: none"> • Resistant to both H and R • With or without resistance to other first line anti-TB drugs • May have additional resistance to any/all FQ or any/all SLI anti-TB drug.
Pre-extensively drug resistant TB (Pre-XDR-TB)	<ul style="list-style-type: none"> • MDR/RR-TB • Resistant to any FQ
Extensively drug resistant TB (XDR-TB)	<ul style="list-style-type: none"> • MDR/RR-TB and are also r • Resistant to any fluoroquinolone (levofloxacin or moxifloxacin) and at least • Resistant to Group A drug (Bdq or Lzd or both)

Treatment of TB

IMAએ ગુજરાત બ્રાંચ દ્વારા ગર્લ ચાઇલ્ડ પર વેબિનાર યોજાવ્યો સેવ ધ ગર્લ ચાઇલ્ડને લઇને ઘણા નિયમ બદલાયા પણ કોઇ જ અસર થઇ નથી

અમદાવાદ | ઈન્ડિયન મેડિકલ એસોસિએશન ગુજરાત સ્ટેટ બ્રાંચ દ્વારા ઈન્ટરનેશનલ ગર્લ ચાઇલ્ડ ડેની ઉજવણી ઓનલાઇન કરવામાં આવી હતી. જેમાં અમદાવાદ મેડિકલ એસોસિએશન અને વિષેન ડોક્ટર્સ વિંગ, લેડિઝ ક્લબ મેડિકલ એસોસિએશન સાથે શહેરના તેમજ દુનિયાભરના ડોક્ટર્સ જોડાયા હતા. આ ટોકમાં ગેસ્ટ તરીકે ભૂતપૂર્વ ચીફ જસ્ટિસ ડૉ. જ્યોત્સના યાશિક ઉપસ્થિત રહ્યાં હતાં. આ વર્ષે અમ્બાવર ગર્લ ફોર બેટર ટુમોરો થીમ પર વાત કરતાં જણાવ્યું કે, સેવ ધ ગર્લ ચાઇલ્ડ વાક્ય આવે એટલે બે પ્રકારના અર્થ નીકળીને આવે એક જે ખૂબ પ્રેસિયસ છે એટલે તેને સુરક્ષિત રાખવું જોઈએ અને બીજું ખૂબ મુશ્કેલીમાં છે એટલે બચાવવું જોઈએ. ગર્લ ચાઇલ્ડને બચાવી પડે

છે કારણ કે તે મુશ્કેલીમાં છે દુનિયામાં આવે કે પહેલા તેને મારી નાખવાના પ્રયાસ કરવામાં આવે છે. એટલા માટે જેને બર્થ રેટ નીચો છે. મધ્યપ્રદેશ અને હરિયાણાનાં કેટલાક એવા ગામ છે જ્યાં બાળકીનો જન્મ નથી થયો. બેટી બચાવી બેટી પણ લિટરસી રેટ જોવા જઈએ તો પુરુષો 87 ટકા છે અને સ્ત્રીઓ 70 ટકા છે. મહિલા વિરુદ્ધ થતા ગુનામાં નેશનલ કાર્ડમ બ્યુરો અંતગત વર્ષ 2020માં

3 લાખ 70 હજાર કેસો નોંધાયા છે. પીસીપીએનડીટી એક્ટ મુજબ ક્યાં બાદ પણ ગર્લ બર્થ પેટનો આંકડામાં થટાસો જોવા મળ્યો છે. કેટલાક લોકો એવું માને છે કે સ્ત્રીઓ દરેક વાતમાં ઈમોશનલ થઈ જતી હોય છે. વધુમાં વાત કરતા તેઓએ જણાવ્યું કે સેવ ધ ગર્લ ચાઇલ્ડને લઈને ઘણા કાયદા અને નિયમો બદલાયા તેમ છતાં કોઈ અસર દેખાતી નથી. સુપ્રીમ કોર્ટ તાજેતરમાં સ્ટેટમેન્ટ આપ્યું છે કે જો પિતા બિનવસિયત ગુજરી જાય તો પુત્રી તે મિલકતની હકદાર કહેવાય છે. સ્ત્રીઓ જે સમાજમાં રહે છે તે ડબલ સ્ટાન્ડર્ડ છે જે વિચારે છે કે કોઈ અને અમલમાં કેઈક કરે છે. જો આ ડબલ સ્ટાન્ડર્ડ વ્યક્તિને જો આપણે ઓબળી શકીશું અને જો સમાજ પ્રભાવિત નહીં થાય તો સેવ ધ ગર્લ ચાઇલ્ડ અવશ્ય થશે.

Test-wary city relies on self-medication

TIMES NEWS NETWORK

Ahmedabad: Dr Pragmesh Vascheharajani, a city-based general physician, says that for every 10 Covid patients they may be seeing, there might be 10 more who are happy popping Doxycycline and other over-the-counter medicines without medical advice.

"Nowadays, everyone has the prescription of the medicines to take - from sore throat to body aches. Often, the prescriptions get circulated around and the medicines are taken without the knowledge of doctors. It's not a healthy trend," he said.

As Covid cases reduce in the city over the past two days as per government data, experts are pointing at the base of the iceberg where many with infections have probably not got medical help at all. Dr Dilip Gadhvi, president of Ahmedabad Medical Association, said that there is nothing like 'non-harmful medicine'. "Every medicine has side-effects, and the treating doctor knows why some of the medicines are prescribed to a specific patient. There could general medicines, but it should not be generalized.

DON'T BE YOUR OWN DOC

HERE'S WHY?

- An ordinary user does not have specialised knowledge on pharmacology principles or specific characteristics
- Incorrect self-diagnosis can result in serious health complications
- Ordinary users do not have the ability to recognise contraindications, interactions, and warning signs
- One may already be taking an active substance under a different name
- An ordinary user may not recognise the correct dosage, may use it excessively over a prolonged period
- Unsupervised usage can result in dependence or abuse of medications
- Ordinary users generally are not aware of food and drug reactions

The wrong medication cause complications," he said. Dr Mehul Shah, secretary of Indian Medical Association, Gujarat state branch, said that rational and judicious use of medicines should be under guidance of the

Most Covid-19 patients need only symptomatic treatment. Do not self-medicate with doxycycline, ivermectin, azithromycin, steroids or molnupiravir

Dr Mahesh Desai | INTERNAL MEDICINE SPECIALIST

BUT HERE'S WHAT YOU CAN DO

- Keep wearing masks at all times
- Wash hands or sanitise frequently
- Consult a doctor if you experience symptoms such as cough, fever, body aches etc
- Maintain social distancing in public places
- Take both doses of the Covid-19 vaccine

doctors only "Otherwise we will invite other complications or masking of symptoms. We have already seen the impact of unnecessary use of steroids in the past wave," he said. Steroids are essential in

fighting infectious diseases as they come to one's rescue during severe inflammation and cytokine storm. Used recklessly they can cause life-threatening side effects like mucormycosis, as seen in the second wave.
