STATE PRESIDENT'S MESSAGE

Dear Doctor Colleagues,

First of all, on behalf of all IMA members, I congratulate Dr. Paresh Majumdar and his local organizing IMA-Baroda team; as well as Dr. Mehul Shah and IMA-GSB team, for the superb management in organizing this GIMCON-22, and also for the excellent work done throughout the year 2021-22.

Today I feel very happy and blessed to have become president of Gujarat State Branch of Indian Medical Association.

In 1989, I was inspired to join in the service and in activities of IMA by my senior friend and inspiratory legend, dearly respected in our heart as "The Boss", Dr. Ketan Desai. And since last 33 years, I have continuously remained active in service of IMA.

Today, to become "Pradhan/Mukhya Sevak" of thirty three thousand doctors of Gujarat, is a proud moment and a privilege for me.

In the last 33 years journey, I am trained and nurtured by seniors and members of all zones, namely –Ahmedabad, Vadodara, Rajkot, Surat, West & South.

In these days, when IMA is facing difficult situations and multi-lateral challenges, only our unity will become and remain our strength.

Socially, politically or religiously, we may be part of various groups and factions at personal and individual levels; but for the IMA, we have to get united and use all our social and political might and will power for IMA; keeping "IMA first, IMA must" as our guiding motto & a light house like principle.

Main tasks before us in this coming year are:-

- 1) Membership Drive:-** Number of medical colleges and number of their seats are increasing every year. So, there are abundant numbers of doctors coming out every year. We should enroll at least 5 to 100 new members per branch, depending upon city and size of the branch. Strengthening women's wing, junior doctors wing will help us to bring them closer and

attract them to join; and even having students and intern wings, we can instill in them seeds of desire to become members in near future.

- 2) We shall organize zonal and branch wise seminars about Professional Protection Scheme, Social Security Scheme, Health Scheme and Family Welfare Scheme. Even to small center members, we must reach out and explain them the benefits of these schemes.
- 3) In every possible center, it will be our endeavor to create medico-legal cells., and organize seminars on "legal literacy". We shall try our best to educate members, how to have proper and diplomatic language while discussing every pros and cons of a medical or surgical therapy. This is very important in this media era. Rather than patients or relatives secretly recording our conversation while explaining, we should officially video or audio record the entire process of giving consultation and advises to patients and especially to relatives, more so to possibly notorious relatives and their social activists.
- 4) Like political parties, it is now high time that every IMA branch should have their/our own Media handling and IT team. We should also have a "rapid action force" teams of friends in every branch.
- 5) In case of any disputes between member doctor and patients or relative, even if it is just a hot verbal, and in cases of any violence or threats of, against members; we must soon move the police into it, and take all necessary judicial steps. Taking official steps against many such relative, will slowly help us in general, to curb down such incidences.
- 6) To warm up and make more cordial the doctor patient relations, we will also organize doctor-patient-relatives seminars, taking help from NGOs and religious santhas
- 7) To make sure that all orders which are coming from national and state Head Quarter of IMA are followed strictly by all members, we shall organize frequent online meetings with presidents and secretaries of state branches.
- 8) Mix-o-pathy hospitals acts, fire safety NOC, Bio medical waste etc. rules are to be followed by all of us. But we should also have to make the government and their authorities to understand to implement such acts and laws with proper understanding of local circumstances with favorable discretion, without discrimination. We shall have proper and good dialogue with government/s about this.

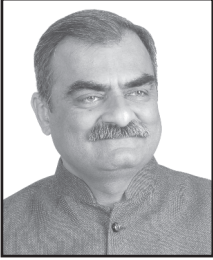

- 9) We shall also have good dialogue with government to have improvement in their health services, for which they should take expert doctors in advisory committee, and to have increase in health budget. Also, we shall request government to increase number of MBBS doctors in rural area, rather than just increasing Ayush doctors.
- 10) We will also request government to increase salary, incentives and other allowances for MBBS and PG doctors.
- 11) Allopathy system is the most scientific of all medical systems of the world. However, many persons of other pathies do advertise and make intended propaganda against our system. We shall take staunch and firm stand against such persons, and if needed, bring them to courts of law. We will prevent them from claiming that "their pathy is superior to allopathy"
- 12) We will also make sure to take strict actions against our own members, who's behavior is to break our unity, who are doing advertisements and bill boards and hoardings, breaking the ethics of our noble profession.
- 13) We shall also encourage ad guide IMA branches to run their own Bio medical waste disposal systems, and be "atmanirbhar" in this regards.
- 14) I am very happy to inform and invite all members to attend a one day medico-spiritual conference organized by IMA-GSB, at Pramukh Swami Shatabdi Nagar, Ahmedabad on 18th December 2022. For this conference, our venue host is BAPS sanstha on the occasion of PSM-100. This conference will also give a nice opportunity to visit the nagar-darshan in a specially arranged guided VIP tour.
- 15) Before I conclude, I strongly appeal and request all our members, to canvass for and support our doctor members who are contesting as candidate in coming Gujarat Assembly elections.

Jay IMA, Jai Gujarat, Jai Hind...

Thank You Very Much... I remain,

Yours sincerely,

Dr. Mahavirsinh M. Jadeja
President, G.S.B., I.M.A.

**HON. STATE SECRETARY'S MESSAGE**

Dear Members,

**“Of all that is good, sublimity is supreme.
Succeeding is the coming together
of all that is beautiful.**

**Furtherance is the agreement of all that is just.
Perseverance is the foundation of all actions.”**

- Lao Tzu

The state of Gujarat goes to the elections this year and it is our moral responsibility to choose the best candidate available for the job. But again, are we in a veritable situation where our decision counts and the voice of the people is the true mandate? Whatever may be the outcome, our prime intention is to vote for the progress and growth of the nation as a whole. It is not a singular individual who rules the roost, but is an amalgamation of many intellectuals who influence the smooth functionality of the Indian Legislative system.

**“People are definitely a company's or country's greatest asset.
It doesn't make any difference whether the product is politics,
cars or cosmetics.**

A company is only as good as the people it keeps.”

A special vote of appreciation and congratulations to the newly elected team of office bearers at IMA GSB. Our special commendation to **Dr. Mahavirsinh M. Jadeja** for being elected to the post of President, IMA GSB, Gujarat State.

The medical fraternity and its members are now regularly facing backlash and are being dragged to the court of law to face many

cases related to medical negligence and difficult practice in medicine. But it seems better that we ourselves become self-protectors and learn the basics of medical ethics and law and all branches of medico-legal practice associated with it.

It is with great pride that we announce our association with Gujarat National Law University (GNLU) to provide a post graduate diploma in medical law, policy and ethics. Request members to register at the earliest for this one year online course.

For generations medicine, spirituality and healing have always gone hand in hand. So it comes as no surprise that IMA GSB was invited to be part of the elite Pramukh Swami Maharaj Shatabdi Mahotsav. IMA invites all its members to be a part of this prestigious and global event – The Medico-Spiritual Conclave to be held on 18th December, 2022.

It is the season of conferences and CMEs. It is also that time of the year when festivals and functions are at the premium and medical practice takes a step backward. The healthy season is on in full swing. So let's enjoy it to the fullest and hope to end this year on a high note.

Dr. Mehul J. Shah
Hon. State Secy., G.S.B., I.M.A.

INDIAN MEDICAL ASSOCIATION GUJARAT STATE BRANCH

Appeal

All our members are requested to Cast their Vote & Contribute in this Great Festival of Democracy. Voting is our moral duty.

IMA Morbi – Fearless in Eye of Disaster

It was a tragedy of unsurmountable proportions. The whole world was recovering from the spate of calamities during the Corona pandemic, and people were completely in the throes of Diwali celebrations and disaster struck. A calamity of huge proportions struck the sleepy and serene town of Morbi, located some few kilometres away from the epicentre of the dreaded earthquake that shook Gujarat in 2001.

A catastrophe that jolted the machinery from their deep slumber and the people were aghast running around helter-skelter trying to grasp the magnitude of the calamity

But as the need arose, the society and its people gathered all necessary relief for the people affected by the disaster.

It came as no surprise that the medical fraternity was again thrown into the frontline for providing aid, assistance and medical relief to all the injured, critically maimed and the hapless souls in distress.

“We don't even know how strong we are until we are forced to bring that hidden strength forward. In times of tragedy, of war, of necessity, people do amazing things. The human capacity for survival and renewal is awesome.” g,

– Isabel Allende

IMA-GSB is truly overwhelmed by the prompt and punctual service provide by the doctor members of IMA Morbi who helped save many a life through their relentless pursuit of life saving manoeuvres during these calamitous times.

Our heartfelt appreciation, admiration and gratitude to all members who have supported directly or indirectly through any means – whether their physical presence, financial assistance or through their medical skills. It was the need of the hour and the

alertness and readiness of the medical fraternity especially members of the IMA at the hospital and clinics, is really commendable.

We at IMA GSB are truly proud of our Local Branch – Morbi for having raised the bar yet again by providing selfless and relentless medical aids in such trying times and salutations also to the undying spirit of the doctors who put in long hours to bring a semblance of normalcy in the livelihood of all those who survived this terrible catastrophe.

“To have endured horrors, to have seen the worst of humanity and have your life made unrecognizable by it, to come out of all that honourable and brave— that was magical.”

Primary tracheal Hyalinizing clear cell carcinoma (Clear cell carcinoma) – A rare salivary gland type neoplasm

Hyalinizing clear cell carcinoma (HCCC) was first described in 1994 by Milchgrub et al. in their series of 11 patients as a distinctive low-grade carcinoma predominantly occurring in the intraoral minor salivary glands, more commonly in middle-aged women. It is composed of cords, nests, islands and trabeculae of monomorphic glycogen rich clear and eosinophilic cells infiltrating a characteristic juxtaposition hyalinized and fibro cellular stroma. Hyalinizing clear cell carcinomas (HCCC), now referred to as clear cell carcinomas (CCC) by the World Health Organization (WHO).

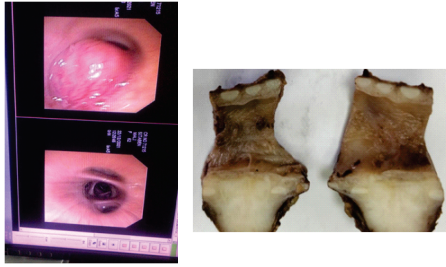

In approximately 80% of patients, the primary tumour is located within the oral cavity, involving the minor salivary glands; the most frequent site of occurrence being the tongue and palate, which account for >50% of tumours. Other less common sites include the parotid gland, subglottic larynx, nasopharynx, and hypopharynx. Tumour metastasis has been reported in up to 25% of patients at initial presentation, primarily to regional lymph nodes and rarely to the lung. Primary tracheal HCCC is an extremely rare and very few cases have been reported till date.

We present here a case of a 63 year old lady presented with dyspnoea. On CECT there was a polypoidal lesion along right lateral wall of upper trachea (D2 - D3 spine level), causing partial narrowing of tracheal lumen. Under bronchoscopy evaluation: there was a submucosal elevated lesion. Overlying mucosa was non ulcerated.

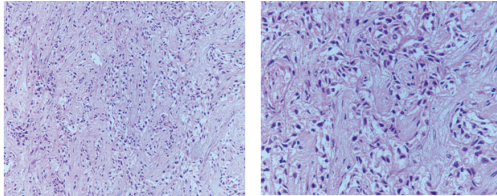

We have received transbronchial biopsy from tumour for histopathological examination. The tumour was located submucosally with the overlying mucosa was ulcerated. The tumour was composed of nests of cells with monomorphic nuclei and water clear cytoplasm and set in a hyalinised and septae. Few cells were with eosinophilic cytoplasm are seen. At periphery, lymphocytic infiltrate is seen. No mitosis or marked pleomorphism or necrosis are seen.

Based on morphological findings, few differential diagnosis were offered as possibility of salivary gland tumour (Myoepithelioma / clear cell carcinoma) or paraganglioma.

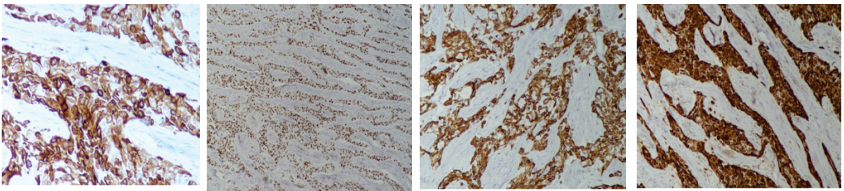

Keeping with these differential diagnosis, panel of immunohistochemistry was performed and also special stains. The tumour cells were positive for CK 7, EMA, p40, p63 and CK 5/6. They were negative for S 100, c-kit,

Bronchoscopy image and gross image of the tumour

H & E (5x and 40x) small monomorphic cells with clear cytoplasm and hyalinized stroma

Immunohistochemistry CK 7, P63, EMA and CK 5/6 (Fig. 1 to 4)

synaptophysin, chromogranin A, TTF1/ Napsin A and Vimentin. The cells were positive for PAS stain and negative for d-PAS. The Ki 67 proliferation index was very low.

We have received wide local excision of this tumour with regional lymph node dissection. It was measuring 1.7 x 1.5 x 1.2 cm with yellowish white, solid firm and homogenous appearance and firm in consistency. On microscopy similar morphology as of biopsy specimen was seen. No necrosis, haemorrhage or increased mitosis or pleomorphism noted. No tumour emboli noted. Margins of excision were free of tumour and regional lymph nodes were free of metastasis.

INDIAN MEDICAL ASSOCIATION-GUJARAT STATE BRANCH (IMA-GSB)**

Duration of the Programme : 1 Year (January -December 2023)

Total Credit to be offered : 26 credits

ABOUT THE PROGRAMME

Medical Law is a scientific field that concerns the rights and duties of Medical Professionals as well as patients. The changing scenario of public health to a fundamental human right entrusts a huge responsibility on the medical professionals. Detailed knowledge on Legislations governing varied aspects of Medical Practice is inevitable for the Medical Professionals. In majority of the developed nations, Medical Law has gained the status of a separate discipline, studied with the cooperation of Law schools and Medical schools.

The knowledge of Medical Laws will enable the Medical Practitioners to develop critical thinking about legal, ethical and professional issues and also to take decisions which are professionally, ethically and legally justifiable. In this era of globalization and the increasing challenges encountered due to health emergencies, it becomes essential for medical professionals to understand the stand of international law and domestic law in ensuring healthcare to public.

The programme will offer the opportunity to study the contemporary legal and ethical challenges faced by those working in the healthcare sector. The course aims to acquaint the medical practitioners with the evolving issues such as assisted reproduction, abortion, genetics, mental health, standards of medical treatment, transplantation medicine, euthanasia health research, advanced directives/decisions, and the allocation of scarce resources.

ABOUT GNLU

Gujarat National Law University (GNLU), Gandhinagar, (www.gnlu.ac.in), GNLU is a University established by the Government of Gujarat through Gujarat National Law University Act, 2003. GNLU is recognised by the Bar Council of India (BCI) and the University Grants Commission (UGC). GNLU is a member of the Association of Indian Universities (AIU); the United Nations Academic Impact (UNAI); and, the International Association of Law Schools (IALS). GNLU offers interdisciplinary legal courses in five faculties namely, B.A.LL.B, B.Com. LLB, B.Sc. LLB, BSW, LLB, BBA, LLB; post-graduate programme namely, LLM as well as doctoral programmes in law and interdisciplinary fields and foreign law and languages programmes. In keeping pace with demand of the different stakeholders, GNLU further offers PG Diploma in Biotechnology, Law and Policy, PG Diploma in Intellectual Property Rights, PG Diploma in Medical Law, Policy and Ethics and IFSCA GNLU Certificate Course on Financial Market Laws. Over a period of time since its inception, the University has established itself as a leading National Law University in the country, with its intensive focus on research-based activities and teaching through the establishment of specialized Centres, organizing extension and training programmes, national and international conferences, guest lectures and collaborations for faculty and student exchange programmes. For its exemplary efforts in the promotion of legal education, UGC has recognized GNLU as a model legal university in terms of access, equity, relevance, and high standards in 2011. The National Assessment and Accreditation Council (NAAC) has accredited the University with an 'A' Grade in 2016.

ABOUT IMA-GSB

Indian Medical Association Gujarat State Branch (IMA GSB) was established in the year 1945. IMA GSB is a professional organization representing allopathy doctors across the state of Gujarat having more than 33620 registered members. These members are spread throughout the state and represent more than 113 local branches in Gujarat.

Since its inception, IMA GSB is involved in various health related projects and activities in association with Govt. of India, the State Government and with the International Health Agencies like World Health Organization, UNICEF etc. The main activity of Indian Medical Association, Gujarat State Branch is to organize scientific programs (CME) for members of the association. The primary aim is to update its members with recent advances in the field of Modern Medicine.

IMA GSB is actively involved in implementation of National as well as State Health programs proposed by different State Governments. The association is primarily active in bridging the divide between the layman and its members. Hence as a part of its commitment to society, IMA GSB organizes various medical and health check-up camps in different rural areas of Gujarat under 'Aao Gaon Chale Program'. IMA GSB is ardently pursuing all activities related to medicine in the state of Gujarat and provides the best of support, help and advice to all its members through an all-encompassing module of schemes and projects. GSB is ardently pursuing all activities related to medicine in the state of Gujarat and provides the best of support, help and advice to all its members through an all-encompassing module of schemes and projects.

OBJECTIVES

The broad objective of offering this course is to spread awareness of various legal aspects involving the medical profession and its practice.

- 1) To acquaint the medical professionals and the students of medicine and public healthcare with the legal frameworks on health and medicine.
- 2) To study the healthcare reforms in India and the role played by International Law, Indian Judiciary and Legislature in recognising health as a Fundamental Right.
- 3) To sensitize the medical practitioners on their rights and legal duties towards the patients and the public in general.
- 4) To study the legal issues involving the medical profession and how the law can be used as a tool to resolve such problems.
- 5) To understand the contemporary issues and challenges involving Public Health, Medicine and Law in India.

COURSE LEARNING OUTCOMES

Upon successful completion of this course, the learners will be able to;

- 1) Appreciate and understand the legal framework surrounding medical education and profession.
- 2) Appreciate the legal and ethical provisions involving the Medical Profession including Biomedical research.
- 3) Understanding on rights and duties of a medical practitioner initially as a citizen of India and as a medical professional. Further appreciate how some legal issues and situations arising out of negligence, malpractices and unethical practices are dealt with by the Indian Legal System.
- 4) Understanding on the need and significance of protection of Intellectual Properties under various legal frameworks.

ELIGIBILITY FOR ADMISSION

The eligibility criteria are as follows;

- MBBS degree from any recognised national or foreign university.
- Preference shall be given to the candidates registered with IMA-Gujarat State Branch.
- Registration with IMA-any other State Branch.

PEDAGOGY

Regular Classes (weekend-blended mode), Discussions, Presentations, Case Law Method

PROGRAMME STRUCTURE

COMPULSORY COURSES

Compulsory Courses-Semester I (12 Credits)

- Introduction to the Indian Legal System
- The Legal Spectrum Regulating Public Health, Healthcare and Medical Profession: National and International Scenario
- Medical Practice: Issues and Litigation
- Mental health and Law
- Elective subject to be chosen from the given list of elective courses

Compulsory Courses-Semester II (14 Credits)

- Professional Conduct, Etiquette and Ethics
- Medical Law and Ethics: Emerging Issues and Concerns
- E-Health and Regulation
- Case Study and Report Submission
- Elective subject to be chosen from the given list of elective courses

ELECTIVE COURSES

Elective Paper for Semester I

- Law and Ethics in Relation to Biomedical Research and Experimentation
- Regulation of Drugs, Patenting of Drugs and Access to Medicine
- Forensic Science and Law

Elective Paper for Semester II

- Disability, Law and Policy
- Genetics and Law
- Health Insurance

ADMISSION PROCEDURE

- For admission form, visit GNLU Website (<https://gnlu.ac.in/GNLU/PG-Diploma-in-Medical-Law,-Policy-and-Ethics#parentVerticalTab1>)
- Applicants are required to read the Regulations and Eligibility Criteria mentioned in the website of GNLU.
- Please use the latest coloured passport size photograph in the Application form.
- Last date of Application 25/12/2022 by 05:00 PM.
- Duly filled application along with the enclosures shall be mailed to pgdm1pe@gnlu.ac.in.

R- 13014/18/2022- Ethics/

Dated the 20th September, 2022

Guideline on Aesthetic Surgery and Hair Transplant Procedures

Hair transplantation:

Any procedure involving a skin incision for the purpose of tissue removal from the scalp or body, or to prepare the scalp or body to receive tissue, (e.g., incising the FUE graft, excising the donor strip, creating recipient sites) by any means, including robotics, is a surgical procedure. Such procedures must be performed by a properly trained and licensed Registered Medical Practitioner (RMP) i.e practitioner of Modern Medicine: RMPs who perform hair restoration surgery must possess the education, training and current competency in the field of hair restoration surgery like adequate knowledge in hair physiology, pathogenesis of scarring and non-scarring alopecia, anatomy and physiology of scalp including scalp vasculature and nerve supply, adequate clinical skill to identify patients Who are candidates for hair, transplant surgery and contraindications for hair transplant including active scarring alopecia, adequate knowledge and clinical skill pertaining to the medical treatment of alopecia and pre and post-transplant medical care, acquired basic knowledge and skill base in surgeries pertaining to skin and its appendages, adequate training and knowledge pertaining to medical issues and possible adverse reactions that can arise during the hair transplant surgery including basic life support and resuscitation measures.

The hair transplant should preferably be undertaken only by those who have surgical grooming like formal surgical training such as MCh/DNB Plastic surgery, MD/DNB Dermatology with adequate grooming in dermatological surgical procedures. It is also noted that the above-named specialties have Hair transplantation as a core topic in their Curriculum.

The following aspects of hair restoration surgery should only be performed by a RMP:

- Preoperative diagnostic evaluation
- Surgery planning
- Surgery execution including: Donor hair harvesting, Hairline design. Recipient site creation and Management of other patient medical issues and possible adverse reactions
- Post-operative care

It is unethical for a RMP to train an individual to perform/assist surgery who is not an accredited health professional licensed to do so.

Minimum requirements in a hospital/clinic performing hair transplant surgery

The day care theatre should be equipped with facilities for monitoring and handling emergencies including stocking of emergency drugs, Boyle's machine, intubation sets and ambu bag. A plan for handling emergencies should be in place and all nursing staff should be familiar with the emergency plan. It is ideal to have a standby anaesthetist.

Aesthetic Procedures:

Aesthetic Procedures should be undertaken only by those RMPs who have adequate training to do these procedures as per their curriculum.

So, curriculum of various specialties should be guiding principle for all RMP's while undertaking any procedure including aesthetics & Hair transplant procedures.

Aesthetic Procedures including Hair Transplant:

Aesthetic Procedures including Hair Transplant as with any other surgical procedure, may have complications and requires skills and training in appropriate patient selection, differential diagnoses and surgical techniques and appropriate post procedure care to optimize outcomes. It is suggested that anyone who wishes to perform these procedures should be adequately knowledgeable and trained and should ensure that they have adequate infrastructure and manpower to manage any issues that may arise due to procedure performed.

Aesthetic Procedures including Hair Transplant are not an Emergency Surgery, and hence there is no case for allowing any untrained person to do it under the pretext of "Exceptional Circumstances". Para 6 of the Judgment mentions "Hair transplantation being an aesthetic surgery needs to be performed by RMPs like qualified dermatologists or trained surgeons".

- I It may be noted that watching in workshops or on YouTube or similar platforms is not adequate training to start Aesthetic surgeries including hair transplant.
- II Assistants or OT technicians; should be from a medical background, such as nurses, lab technicians, pharmacists. However, they need to be provided structured, systematic, and proper training (responsibility will lie with the RMP) in all aspects of both aesthetic surgery and disinfection, sterilization, patient communication etc.
- III Surgical assistants/technicians should perform tasks only under the supervision of a RMP.

The RMP should have an anesthesia backup in the form of presence of the anesthetist in the operation room area with all the requisite resuscitative equipment and drugs in place,

The RMP should ensure that the patient undergoing such a surgery should have adequate preoperative clearances from the medical specialists and the anesthetist.

The RMP should have a well-equipped postoperative recovery room with facilities for monitoring of vitals and adequate record keeping.

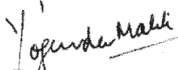

Manpower and Infrastructure required at place of such procedure

Manpower :-

Apart from the surgeon performing hair transplantation and Aesthetic surgery, the centre should also have trained OT personnel like staff nurses, technicians, OT masters etc.

Infrastructure:-

1. It should be a hospital with facilities for treating indoor patients.
2. There should be properly set up operation theatre with all OT protocols being followed or implemented strictly like
 - Strict asepsis and fumigation protocols.
 - Proper biomedical waste management like separation, transfer/transport and disposal.
 - Proper sterilization of instruments, drapes etc.
3. Availability of anaesthetist as it is an Invasive OT procedure. Crash cart trolley should be available with all resuscitative facilities.
4. If it is a clinic doing day care surgeries only, then it should be well connected with any nearby hospital with proper ICU and critical care facilities, if needed in case of any emergency and with a display of 24 hrs emergency number for help. .
5. Proper records of operated patients with pre and post operative photographs, records of any complication need to be maintained.
